7. The sale of the property will not become absolute until the sale has been confirmed by the Dewan.

8. Purchasers having completed the payment of the purchase money will, as soon as the sale has been confirmed by the Dewan, be placed in immediate possession and the village will be registered in the name of the purchaser, and a certificate of sale signed and sealed by the Deputy Commissioner will be granted to him. PART I.

Notifications by the Dewar to His Highness the Maharaja of Mysore.

GENERAL.

No. 207.

NOTIFICATIONS.

The 22nd February 1886.

In supersession of previous rules, the following rules are sanctioned by His Highness the Maharaja for the grant of mining leases in Mysore. They do not apply to the Kolar Concessionaires, or to mining leases already executed by the Government.

Leases of land for mining purposes will be given subject to the following rules and conditions:—

I. Each lease will be limited to a block not exceeding one square mile in area, and will be given for a term of 30 years according to priority of application. Applications for more than one block from the same applicant will be taken into consideration if there are no other applicants and if no other objection exists.

II. (1). Every application for a lease must be presented to the Secretary to the Dewan in the Revenue Department and be accompanied by a deposit of a sum of Rs. 1,000 for every square mile or fraction of a square mile applied for, as security for the due fulfilment of the engagement made by the applicant.

(2). Every application must also be accompanied by an extract from the Topographical, Revenue Survey, or other official map, and the land applied for should be marked upon such extract together with the names of all villages by which it may be surrounded.

(3). The applicant must point out to the Survey and Local Revenue officers the boundaries of the block of land applied for by him within a fortnight of the Government order for a survey being communicated to him.

(4). After the completion of the survey and needful enquiries by the Survey and Revenue officers, full particulars as to extent and assessment together with printed blank forms of leases to be executed and a bill for the survey and demarcation expenses will be sent to the applicant, who should, within a month from date of receiving such communication, tender for the Dewan's signature the lease in duplicate executed by himself and duly stamped, paying at the same time the cost of the survey and demarcation.

(5). Failure to comply with paras 3 and 4 of this rule will involve cancellation of the application and forfeiture of the sum deposited with it.

(6). The applicant's title to the land applied for will not be complete till the lease is actually executed by the Dewan.

(7). The lease should, after execution, be registered under the law for the time being for the registration of assurances, and the duplicate copy thereof should be deposited with the Mysore Government.

III. The lessee is to make his own arrangements with the holders of Government occupied assessed and inam lands in regard to entering upon or obtaining possession of them.

IV. The lessee is to pay to Government the annual assessment, as now existing or as hereafter revised by any survey, on all the arable lands, occupied or waste, and the jodi, or quit-rent on any inam lands, as well as an assessment of eight annas per acre on all the unarable lands which may be included within the limits of the lease, together with all local cesses and other taxes or rates of every description payable in respect of the premises or lands comprised in the block, or of buildings or works erected thereon.

V. The lessee is to pay a royalty of 5 per cent on the gross proceeds of all gold, metallic ores, coal and other substances of a merchantable nature, which shall have been dressed, crushed and made merchantable, and of 10 per cent on the saleable value of all precious stones found in the selected block, clear of all deductions whatsoever.

VI. The lessee is to search and mine for gold, &c., throughout the term of the lease in the best and most effectual manner without intermission except when prevented by inevitable accident. But after the expiry of the first two years of the lease, the Government reserves to itself the option of levying in lieu of the royalty an assessment of Rs. 5 per acre in the event of its not being satisfied with the working or its results for any years of the lease.

VII. The lessee is required to keep regular accounts and plans and maps of the mines and workings, which are to be open to inspection by Government officers.

VIII. Government officers are authorized to inspect and examine the mines.

IX. The lessee is to keep all boundary marks in good order, and to fence every shaft, pit or open working.

X. The lessee is not wilfully to close, fill up or choke any mine or shaft without permission, and not to obstruct any existing roads, paths or by-ways on the land.

XI. The Government are authorized to recover any arrears of rent by distraint and sale of property belonging to the lessee, and in the event of the breach of any of the covenants on the part of the lessee, or of his causing any annoyance or obstruction to any class of persons or Government officials, the Government can cancel the lease on due notice and in default of satisfactory explanation within six months.

XII. In the event of the lessee not desiring a renewal of the lease on such terms as the Government may fix, he will be bound to deliver the land to Government at the expiration of his lease, with the shafts and other premises in good repair and working order, together with the books, maps and plans, free of any claim on account of buildings or other property left standing on the lands. And he should permit the purchase by Government of the buildings, plant, machinery and fittings at a fair valuation.

XIII. Any arrangement for commuting the royalty by a present payment of a lump sum as is sanctioned to the Kolar Concessionaires will be specially considered in each case; but the Government does not undertake to allow such commutation necessarily in every case; nor to grant every application for a lease as a matter of course.

XIV. (1). Every assignment of the right, title and interest granted by the lease, whether such assignment be made by the lessees or their successors by assignment, however remote, shall be subject to the payment to the Government of Mysore of a fine which shall be regulated as follows,

namely :—for the first assignment, a fine of $\frac{1}{10}$ th of the consideration therefor, and for every subsequent assignment a fine of $\frac{1}{10}$ th of the excess, if any, of the amount of consideration for such assignment over and above the amount of consideration for the assignment immediately preceding it.

(2). For the purpose of computing the fine aforesaid, any shares in a Company which may form the whole or part of the consideration may, at the option of the Government, be regarded as equivalent to the nominal value of such shares.

(3). The Government always to have the power of determining the present value of the consideration for a previous assignment, when the amount thereof has to be deducted from the amount of the consideration of a subsequent assignment for the purpose of computing the fine leviable on the latter.

Illustration.

If the lessees assign the lease to A for a consideration of Rs. 100, the fine payable is Rs. 10; if A afterwards assigns the lease to B for a consideration of Rs. 1,000, the fine payable is Rs. $\frac{1,000-100}{10}$, or Rs. 90; if B afterwards assigns the lease to C and Company for a consideration of Rs. 1,00,000 in cash and of 500 shares in C and Company, the nominal value of each share being £ 1, the fine payable is Rs. $\frac{1,00,000-1,000}{10}$, or Rs. 9,900 in cash together with either 50 shares in C and Company or £ 50 in cash at the option of the Government; if C and Company afterwards assign the lease to D and Company either for an annual rent of £ 10,000 or for a royalty of 10 per cent of the proceeds of the mine, the fine payable is either £ 1,000 per annum or a royalty of 1 per cent of the proceeds of the mine, as the case may be; if the under-lease from C and Company is afterwards assigned by D and Company to E for £ 10,000 in cash and £ 10,000 payable at the end of two years, the fine on account of such assignment is £ 1,000 in cash and £ 1,000 payable at the end of two years less such present value as the Government may fix for the annual rent of £ 1,000 or for the royalty of 1 per cent of the proceeds of the mine leviable on account of the under-lease to D and Company.

XV. A form of lease to be granted under these rules is hereunto appended.

GENERAL.

NOTIFICATIONS.

The 2nd March 1886.

No. 211.—His Highness the Maharaja has been pleased to direct that the designation of the office of "Secretary to the Dewan in the Revenue and General Departments" shall be changed into "Chief Secretary to the Dewan".

The 22nd February 1886.

No. 207.—In supersession of previous rules, the following rules are sanctioned by His Highness the Maharaja for the grant of mining leases in Mysore. They do not apply to the Kolar Concessionaires, or to mining leases already executed by the Government.

Leases of land for mining purposes will be given subject to the following rules and conditions:—

I. Each lease will be limited to a block not exceeding one square mile in area, and will be given for a term of 30 years according to priority of application. Applications for more than one block from the same applicant will be taken into consideration if there are no other applicants and if no other objection exists.

- II. (1). Every application for a lease must be presented to the Secretary to the Dewan in the Revenue Department and be accompanied by a deposit of a sum of Rs. 1,000 for every square mile or fraction of a square mile applied for, as security for the due fulfilment of the engagement made by the applicant.
- (2). Every application must also be accompanied by an extract from the Topographical, Revenue Survey, or other official map, and the land applied for should be marked upon such extract together with the names of all villages by which it may be surrounded.
- (3). The applicant must point out to the Survey and Local Revenue officers the boundaries of the block of land applied for by him within a fortnight of the Government order for a survey being communicated to him.
- (4). After the completion of the survey and needful enquiries by the Survey and Revenue officers, full particulars as to extent and assessment together with printed blank forms of leases to be executed and a bill for the survey and demarcation expenses will be sent to the applicant, who should, within a month from date of receiving such communication, tender for the Dewan's signature the lease in duplicate executed by himself and duly stamped, paying at the same time the cost of the survey and demarcation.
- (5). Failure to comply with paras 3 and 4 of this rule will involve cancellation of the application and forfeiture of the sum deposited with it.
- (6). The applicant's title to the land applied for will not be complete till the lease is actually executed by the Dewan.
- (7). The lease should, after execution, be registered under the law, for the time being for the registration of assurances, and the duplicate copy thereof should be deposited with the Mysore Government.

III. The lessee is to make his own arrangements with the holders of Government occupied assessed and inam lands in regard to entering upon or obtaining possession of them.

IV. The lessee is to pay to Government the annual assessment, as now existing or as hereafter revised by any survey, on all the arable lands, occupied or waste, and the jodi or quit-rent on any inam lands, as well as an assessment of eight annas per acre on all the unarable lands which may be included within the limits of the lease, together with all local cesses and other taxes or rates of every description payable in respect of the premises or lands comprised in the block, or of buildings or works erected thereon.

76

V. The lessee is to pay a royalty of 5 per cent on the gross proceeds of all gold, metallic ores, coal and other substances of a merchantable nature, which shall have been dressed, crushed and made merchantable, and of 10 per cent on the saleable value of all precious stones found in the selected block, clear of all deductions whatsoever.

VI. The lessee is to search and mine for gold, &c., throughout the term of the lease in the best and most effectual manner without intermission except when prevented by inevitable accident. But after the expiry of the first two years of the lease, the Government reserves to itself the option of levying in lieu of the royalty an assessment of Rs. 5 per acre in the event of its not being satisfied with the working or its results for any years of the lease.

VII. The lessee is required to keep regular accounts and plans and maps of the mines and workings, which are to be open to inspection by Government officers.

VIII. Government officers are authorized to inspect and examine the mines.

IX. The lessee is to keep all boundary marks in good order, and to fence every shaft, pit or open working.

X. The lessee is not wilfully to close, fill up or choke any mine or shaft without permission, and not to obstruct any existing roads, paths or by-ways on the land.

XI. The Government are authorized to recover any arrears of rent by distraint and sale of property belonging to the lessee, and in the event of the breach of any of the covenants on the part of the lessee, or of his causing any annoyance or obstruction to any class of persons or Government officials, the Government can cancel the lease on due notice and in default of satisfactory explanation within six months.

XII. In the event of the lessee not desiring a renewal of the lease on such terms as the Government may fix, he will be bound to deliver the land to Government at the expiration of his lease, with the shafts and other premises in good repair and working order, together with the books, maps and plans, free of any claim on account of buildings or other property left standing on the lands. And he should permit the purchase by Government of the buildings, plant, machinery and fittings at a fair valuation.

XIII. Any arrangement for commuting the royalty by a present payment of a lump sum as is sanctioned to the Kolar Concessionaires will be specially considered in each case; but the Government does not undertake to allow such commutation necessarily in every case; nor to grant every application for a lease as a matter of course.

XIV. (1). Every assignment of the right, title and interest granted by the lease, whether such assignment be made by the lessees or their successors by assignment, however remote, shall be subject to the payment to the Government of Mysore of a fine which shall be regulated as follows,

namely :—for the first assignment, a fine of $\frac{1}{10}$ th of the consideration therefor, and for every subsequent assignment a fine of $\frac{1}{10}$ th of the excess, if any, of the amount of consideration for such assignment over and above the amount of consideration for the assignment immediately preceding it.

- (2). For the purpose of computing the fine aforesaid, any shares in a Company which may form the whole or part of the consideration may, at the option of the Government, be regarded as equivalent to the nominal value of such shares.
- (3). The Government always to have the power of determining the present value of the consideration for a previous assignment, when the amount thereof has to be deducted from the amount of the consideration of a subsequent assignment for the purpose of computing the fine leviable on the latter.

Illustration.

If the lessees assign the lease to A for a consideration of Rs. 100, the fine payable is Rs. 10 ; if A afterwards assigns the lease to B for a consideration of Rs. 1,000, the fine payable is Rs. $\frac{1,000-100}{10}$, or Rs. 90 ; if B afterwards assigns the lease to C and Company for a consideration of Rs. 1,00,000 in cash and of 500 shares in C and Company, the nominal value of each share being £ 1, the fine payable is Rs. $\frac{1,00,000-1,000}{10}$, or Rs. 9,900 in cash together with either 50 shares in C and Company or £ 50 in cash at the option of the Government ; if C and Company afterwards assign the lease to D and Company either for an annual rent of £ 10,000 or for a royalty of 10 per cent of the proceeds of the mine, the fine payable is either £ 1,000 per annum or a royalty of 1 per cent of the proceeds of the mine, as the case may be ; if the under-lease from C and Company is afterwards assigned by D and Company to E for £ 10,000 in cash and £ 10,000 payable at the end of two years, the fine on account of such assignment is £ 1,000 in cash and £ 1,000 payable at the end of two years less such present value as the Government may fix for the annual rent of £ 1,000 or for the royalty of 1 per cent of the proceeds of the mine leviable on account of the under-lease to D and Company.

XV. A form of lease to be granted under these rules is hereunto appended.

By Order,
K. SHESHADRI IYER,

The contractor will be bound for the purpose of this contract by the boundaries of the above mentioned Districts as finally revised by the Government before 31st March 1886.

2. The contract will be given for one year from 1st April 1886 to 31st March 1887.

3. Tenders may be presented either for one lump sum contract for the whole Province comprising the Districts mentioned in para 1, or for each of the 8 Districts separately, so that Government may be in a position to accept one for the whole Province or to dispose of the contract by Districts.

4. Each tender must specify the minimum revenue, which the tenderer will guarantee to Government and shall be for one lump sum exclusive of local-cess for the whole Province, or for each District, must be accompanied by a deposit of Rs. 100 in cash, and enclosed in a cover superscribed with the words "Tender for the exclusive privilege of selling Ganja and any preparation thereof, except Halva, for all the Districts of the Mysore Province."

If one lump sum contract for the whole Province is not intended by the tenderer, the tender shall be superscribed with the words "Tender for the exclusive privilege of selling Ganja and any preparation thereof, except Halva, in the District of . . ."

5. The tenders, whether for the whole Province or for any District only, must be delivered at the office of the Deputy Commissioner of each District on or before the noon of the 16th March 1886, when they will be opened by the Deputy Commissioner in the presence of the applicants. The applicant whose tender may be selected by the Deputy Commissioner for recommendation to Government will be required to deposit at once in cash or in Government securities, a further sum equal to one-twelfth (or one month's instalment) of the amount guaranteed for the year, failing which the deposit made with the tender will be forfeited, and the contract re-sold at the sole risk of the tenderer. The whole of the tenders received by each Deputy Commissioner shall be sent with a list to the Secretary to the Dewan for final selection and approval of Government.

6. When the decision of the Government is announced, the deposits made by the applicants whose tenders have been rejected will be thereupon returned to them on their application. The Government reserves to itself the power of rejecting the highest or any tender without assigning any reason.

7. The party whose tender may be accepted shall, within 8 days after the Government decision has been communicated to him, deposit with the Deputy Commissioner a sum in cash or Government securities duly endorsed, which, with the sums previously deposited under para 3, shall be equal to one-fourth of the yearly revenue guaranteed, and shall execute an agreement in the usual form on proper stamp, binding himself to conform to the conditions hereinafter set forth; and if he fails or refuses to sign the agreement or to make the deposit required, the deposits already made will be forfeited to Government and the lease otherwise disposed of.

8. Should the sales of ganja and its preparations in the year by the contractor to the licensed vendors exceed the guaranteed amount, 25 per cent of such excess shall be duly paid over to Government with the last instalment payable for the year.

Conditions.

- I. The contract shall not be transferable, except with the approval of the Deputy Commissioner.
- II. For the purposes of this contract, Government may decline to recognize any representative agent or partner appointed or taken by the contractor during the period of the contract, unless such representative agent or partner shall have been first approved of by the Deputy Commissioner of the District for the time being.
- III. The minimum revenue guaranteed shall be paid by the contractor into the District Treasury by equal monthly instalments together with local cess thereon, at the rate of one anna per rupee, on or before the 20th day of each month. With the last instalment due for the year shall be paid the 25 per cent on the excess sales over the guaranteed amount. In case of default in the payment of any of the instalments as aforesaid, it shall be lawful for the Deputy Commissioner of the District for the time being to declare the deposit forfeited, to order the farm to be taken under Government management or otherwise at the contractor's risk, or to declare the lease forfeited, and to re-sell it at the contractor's risk and loss, and further to recover all arrears with interest at 6 per cent per annum by the attachment and sale of his property, personal and real.
- IV. The number of shops for the sale of ganja and its preparations and the places at which they are to be kept shall be determined by the Deputy Commissioner or other officer as shall be specified in the agreement, and the contractor shall engage to sell ganja and its preparations only at the places so fixed. The Deputy Commissioner or other officer as shall be specified in the agreement shall be at liberty to make any alterations in the number and localities of the shops that he may from time to time consider necessary, or to close any shop without any claims for compensation on the part of the contractor in the manner and under the conditions set forth in Condition IX of this Notification.
- V. The confirmation of existing retail vendors, the nomination of new vendors, and the cancellation of licenses shall rest with the Deputy Commissioner or other officer as shall be specified in the agreement. The Deputy Commissioner or other officer as shall be specified in the agreement shall issue licenses in the prescribed forms direct to the retail vendor as in the case of other drugs.
- VI. The contractor shall sell ganja and its preparations only to such licensed vendors and shall not interfere with the retail vendors in any way. But he or his authorized agent or wholesale vendor shall be at liberty to visit the drug shops in conjunction with the Excise officers and inspect the accounts, and if he has reason to believe that contraband drugs are being vended in any such shop, shall with the permission of the Amildar, place a nominee of his own to officiate as vendor jointly with the license-holder or vendor of such shop for such time as the Amildar may deem fit, and such nominee shall be confirmed if sufficient grounds exist to justify this step by the Amildar.
- VII. The ganja and majum sold shall be of good quality, not black or old or such as may have lost its medicinal virtues, and must be without stalks and seeds; and not be adulterated, while powdered ganja to the extent of 5 per cent only shall be taken by the vendors and no more. Such powdered ganja may be made up by the retail vendors into halva. The contractor shall always keep on hand not less than one month's supply of ganja.
- VIII. The sales of ganja and its preparations shall be covered by a pass in the prescribed form signed by the contractor or his authorized agent, the conditions whereof shall not be infringed and the wholesale and retail prices shall be uniformly for the whole Province as specified below:—

- IX. The Deputy Commissioner shall have power to close any particular shop or shops on the requisition of the Military authorities or Magistracy temporarily or permanently, and the contractor shall not be entitled to any compensation therefor. But with the approval of the Deputy Commissioner, the number so reduced might, if the public requirements demand it, be re-established in other suitable localities. Should the exigencies of the State require the closing of shops to any number below the complement opened in 1884—85 for the District, the contractor shall, with the sanction of the Government, be granted proportionate compensation for the number so closed on the guaranteed amount paid for the number of shops so licensed in the year, if it be proved that the contractor has sustained loss by such reduction in the number of shops, but not otherwise. The Deputy Commissioner shall freely permit the opening of drugshops at all taluk kasabas, large towns, and villages, where a demand for the same exists, and all such vendors to freely frequent jattras and fairs as provided for in the retail license.
- X. No fee shall be levied for licenses for the retail vend of ganja except in the town of Bangalore and Mysore, where a fee of three rupees and one rupee per mensem respectively shall be charged for each license.
- XI. The Deputy Commissioner may permit the farmer to import ganja from beyond the Territories of Mysore under passes to be issued by him in communication with the authorities of the District from which the article is imported.
- XII. The contractor shall render a true and correct account in duplicate of the sales at his wholesale depôt to the Deputy Commissioner or other officer named in the agreement through the Head Supervisor monthly, and allow the officers of the Excise Department free access always and at all times to all the accounts kept by the contractor which shall be true and accurate and in the forms prescribed by Government in Notification No. 229, dated 27th February 1885 at his own expense.
- XIII. Disorderly conduct and irregular transactions at the wholesale depôt shall not be permitted by the contractor's agent or employés. They shall be provided at the renter's cost with correct scales and weights, the latter duly stamped by Government, and further all such employés shall, 15 days after the agreement is signed by the contractor, enter into engagements with the contractor to abide by the spirit and letter of the conditions entered into by the contractor with Government and the laws and rules in force, and such engagements shall be deposited in the Deputy Commissioner's office by the 20th of the said month without fail, and they shall take out wholesale licenses if employed to sell the drugs, or sign permits for the contractor. 2. The contract will be given for one year from 1st April 1886 to 31st March 1887.

3. Tenders may be presented either for one lump sum contract for the whole Province comprising the Districts mentioned in para 1, or for each of the 8 Districts separately, so that Government may be in a position to accept one for the whole Province or to dispose of the contract by Districts.

4. 5. The tenders, whether for the whole Province or for any District only, must be delivered at the office of the Deputy Commissioner of each District on or before the noon of the 16th March 1886, when they will be opened by the Deputy Commissioner in the presence of the applicants. The applicant whose tender may be selected by the Deputy Commissioner for recommendation to Government will be required to deposit at once in cash or in Government securities, a further sum equal to one-twelfth (or one month's instalment) of the amount guaranteed for the year, failing which the deposit made with the tender will be forfeited, and the contract re-sold at the sole risk of the tenderer. The whole of the tenders received by each Deputy Commissioner shall be sent with a list to the Secretary to the Dewan for final selection and approval of Government.

6. When the decision of the Government is announced, the deposits made by the applicants whose tenders have been rejected will be thereupon returned to them on their application. The Government reserves to itself the power of rejecting the highest or any tender without assigning any reason.

7. The party whose tender may be accepted shall, within 8 days after the Government decision has been communicated to him, deposit with the Deputy Commissioner a sum in cash or Government securities duly endorsed, which, with the sums previously deposited under para 3, shall be equal to one-fourth of the yearly revenue guaranteed, and shall execute an agreement in the usual form on proper stamp, binding himself to conform to the conditions hereinafter set forth; and if he fails or refuses to sign the agreement or to make the deposit required, the deposits already made will be forfeited to Government and the lease otherwise disposed of.

8. Should the sales of ganja and its preparations in the year by the contractor to the licensed vendors exceed the guaranteed amount, 25 per cent of such excess shall be duly paid over to Government with the last instalment payable for the year.

Conditions.

- I. The contract shall not be transferable, except with the approval of the Deputy Commissioner.
- II. For the purposes of this contract, Government may decline to recognize any representative agent or partner appointed or taken by the contractor during the period of the contract, unless such representative agent or partner shall have been first approved of by the Deputy Commissioner of the District for the time being.
- III. The minimum revenue guaranteed shall be paid by the contractor into the District Treasury by equal monthly instalments together with local cess thereon, at the rate of one anna per rupee, on or before the 20th day of each month. The Deputy Commissioner shall freely permit the opening of drugshops at all taluk kasabas, large towns, and villages, where a demand for the same exists, and all such vendors to freely frequent jattras and fairs as provided for in the retail license.

No. 223.—It is hereby notified for public information that the undermentioned kayamgutta and jodi villages, which have been duly attached in satisfaction of the arrears of revenue, due to Government (as shown in the subjoined statement) by the said kayamguttadars and jodidars, will be sold by public auction at the places and on the dates mentioned in the annexed statement. The sale will commence at 11 A. M. on the dates specified, and the villages will be knocked down to the highest bidder without reserve.

2. Provided that when a village is divided into separate recognized vrittis, the Deputy Commissioner may, at his option, instead of selling the village as a whole, sell each vritti separately.

3. The purchaser will be required to deposit 25 per cent of the purchase money at the time of sale, and where the remainder of the purchase money may not be paid within 15 days from the day of sale, the money so deposited shall be liable to forfeiture.

4. When such deposit shall not be made, nor the remaining purchase money paid up, the lands shall be re-sold at the expense and risk of the first purchaser.

5. Persons bidding at the sale may be required to state whether they bid on their own account or as agents, and in the latter case to deposit a written authority signed by their principals, otherwise their bids may be rejected.

6. The sale shall be stayed, if the defaulter, or any other person acting on his behalf, or claiming an interest in the land, tenders the full amount of the arrears of revenue with the interest and other charges, provided such tender be made before sunset on the day previous to that appointed for the sale.

7. The sale of the property will not become absolute until the sale has been confirmed by the Dewan.

8. Purchasers having completed the payment of the purchase money will, as soon as the sale has been confirmed by the Dewan, be placed in immediate possession and the villages will be registered in the name of the purchaser, and a certificate of sale signed and sealed by the Deputy Commissioner will be granted to him. It is to be distinctly understood that the Government are not responsible for errors of description and in estimated extent.

9. Provided parties deeming themselves aggrieved by the sale shall be at liberty to appeal to the Dewan within 30 days from the day of sale, and the purchase shall be conditional on the final order in such appeal.

Under Section 23, Clause 2, of the above Forest Rules, the Government of His Highness the Maharaja directs that the term "firewood" shall ordinarily imply dead bamboos, thorns, brushwood, creepers and dead unserviceable wood of the unreserved kinds. By the term "unserviceable" is to be understood soft, wooded, crooked, hollow, burnt or otherwise damaged so as to be clearly unfit for any other useful purposes than firewood or charcoal. No. 3.—It is hereby notified for public information that the undermentioned jodi villages, which have been duly attached in satisfaction of the arrears of revenue due to Government (as shown in the subjoined statement) by the said jodidars, will be sold by public auction at the places and on the dates mentioned in the annexed statement. The sale will commence at 11 A. M. on the dates specified, and the villages will be knocked down to the highest bidder without reserve.

2. Provided that when a village is divided into separate recognized vrittis, the Deputy Commissioner may, at his option, instead of selling the village as a whole, sell each vritti separately.

3. The purchaser will be required to deposit 25 per cent of the purchase money at the time of sale, and where the remainder of the purchase money may not be paid within fifteen days from the day of sale, the money so deposited shall be liable to forfeiture.

4. When such deposit shall not be made, nor the remaining purchase money paid up, the lands shall be re-sold at the expense and risk of the first purchaser.

5. Persons bidding at the sale may be required to state whether they bid on their own account or as agents, and in the latter case to deposit a written authority signed by their principals, otherwise their bids may be rejected.

6. The sale shall be stayed, if the defaulter, or any other person acting on his behalf or claiming an interest in the land, tenders the full amount of the arrears of revenue with the interest and other charges, provided such tender be made before sunset on the day previous to that appointed for the sale.

7. The sale of the property will not become absolute until the sale has been confirmed by the Dewan.

8. Purchasers having completed the payment of the purchase money will, as soon as the sale has been confirmed by the Dewan, be placed in immediate possession and the villages will be registered in the name of the purchaser, and a certificate of sale signed and sealed by the Deputy Commissioner will be granted to him. It is to be distinctly understood that the Government are not responsible for errors of description and in estimated extent.

9. Provided parties deeming themselves aggrieved by the sale shall be at liberty to appeal to the Dewan within 30 days from the day of sale, and the purchase shall be conditional on the final order in such appeal.

The sale will commence at 11 A. M. on the dates specified, and the villages will be knocked down to the highest bidder without reserve.

8. Purchasers having completed the payment of the purchase money will, as soon as the sale has been confirmed by the Dewan, be placed in immediate possession and the villages will be registered in the name of the purchaser, and a certificate of sale signed and sealed by the Deputy Commissioner will be granted to him. It is to be distinctly understood that the Government are not responsible for errors of description and in estimated extent.

9. Provided parties deeming themselves aggrieved by the sale shall be at liberty to appeal to the Dewan within 30 days from the day of sale, and the purchase shall be conditional on the final order in such appeal.

The sale will commence at 11 A.M. on the date specified, and the village will be knocked down to the highest bidder without reserve.

8. No. 90.—The orders for the partial remission of assessment on wet lands contained in paras 6 *et seq* of Dewan's Proceedings No. 4461—123, dated 29th August 1881 and in Dewan's Proceedings No. 7162—9—219, dated 7th December 1881 are cancelled, and in lieu thereof, the following rules are sanctioned for adoption from the current year 1886—87. These rules will also apply to all wet lands cultivable with vaisakha crops in the current season, whether the land revenue on account of the same is creditable to the accounts of 1885—86 or 1886—87.

I. Dewan's Notification No. 151 of the 30th August 1881 is hereby cancelled with effect from 1st April 1886.

II. When by breaching or any other accident, a tank or other work of irrigation becomes not available for irrigation, no remission of the wet assessment on lands situated under such tank or other work shall, as a rule, be granted for the official year during which the breach or accident

occurs. Special cases, in which the Deputy Commissioner may think some remission of assessment necessary during such year, should be submitted for the orders of the Dewan.

III. But, for the second and succeeding years during which the tank or other work may remain unrestored and unavailable for irrigation, a temporary reduced assessment of half the full wet assessment shall alone be levied as 'Bengar' kandayam, the remaining half being shown in the accounts as a remission, without reference to any dry crops which may be raised.

IV. Lands which, by their situation, are capable of being cultivated with wet crops, notwithstanding the breach or other accident, shall not be entitled to the reduction of assessment referred to in the preceding rule.

V. In the year following the one in which the breach or other accident occurs, the Deputy Commissioner or one of his Assistants shall, after personal inspection during the cultivation season, decide once for all what lands are entitled to the reduced temporary assessment under Rule III.

VI. This temporary reduced assessment shall be adopted at each jamabandi settlement, till the irrigation work is again made efficient by the Government, a statement in the accompanying form being submitted to the Chief Secretary to the Dewan as soon after the close of the jamabandi as possible.

*Proceedings of the Dewan to His Highness the Maharaja of Mysore,
(Revenue),—dated 16th July 1886.*

From the Deputy Commissioner, Hassan District, To the Chief Secretary to the Dewan of Mysore, No. 625—115, dated Hassan, 22nd June 1886.

I have the honor to submit for orders the question whether razinamas may be accepted for land on which crops are standing, the razinama taking effect for the year during which it is tendered though the crops are to be afterwards harvested in the same year. The question arises entirely in the case of lands cultivated with Vaisakha crops which are harvested in May or June in a year, but cultivated and planted in November and December of the previous year. The orders at page 7 of the Mysore Revenue Manual, 1886, (para 2), No. 1090—R. 6, dated 13th May 1874, allow of such resignations being accepted especially because otherwise no resignation can be given after the first month of the new year (April), and it is possible to argue that these orders do not apply to surveyed and settled taluks, the Survey Superintendent's opinion as given in his communication No. 1833, dated 7th August 1884, in the accompanying file of correspondence supporting this argument. According to such opinion two years' assessment becomes due on one paddy crop.

ORDER THEREON.—The orders contained in the late Chief Commissioner's Proceedings No. 1090—R. 6, dated 13th May 1874; (page 7, Revenue Manual, 1886) must apply to both settled and unsettled taluks. Under these orders—

- 1st. Razinamas presented before 30th April may be given effect to from 31st March preceding;
- and 2ndly. Notwithstanding this, the relinquisher shall be permitted to remove any standing *Vaisakha* crop on the land, and for such purpose to remain in possession till 5th June or such other date as the Deputy Commissioner may consider necessary for the removal of such *Vaisakha* crop.
2. The particular case referred to must be disposed of by the Deputy Commissioner as above.

*Proceedings of the Dewan to His Highness the Maharaja of Mysore,
(Revenue),—dated 16th July 1886.*

From the Deputy Commissioner, Hassan District, To the Chief Secretary to the Dewan of Mysore, No. 625—115, dated Hassan, 22nd June 1886.

I have the honor to submit for orders the question whether razinamas may be accepted for land on which crops are standing, the razinama taking effect for the year during which it is tendered though the crops are to be afterwards harvested in the same year. The question arises entirely in the case of lands cultivated with Vaisakha crops which are harvested in May or June in a year, but cultivated and replanted in November and December of the previous year. The orders at page 7 of the Mysore Revenue Manual, 1886, (para 2), No. 1090—R. 6, dated 13th May 1874, allow of such resignations being accepted especially because otherwise no resignation can be given after the first month of the new year (April), and it is possible to argue that these orders do not apply to surveyed and settled taluks, the Survey Superintendent's opinion as given in his communication No. 1833, dated 7th August 1884, in the accompanying file of correspondence supporting this argument. According to such opinion two years' assessment becomes due on one paddy crop.

ORDER THEREON.—The orders contained in the late Chief Commissioner's Proceedings No. 1090—R. 6, dated 13th May 1874, (page 7, Revenue Manual, 1886) must apply to both settled and unsettled taluks. Under these orders—

1st. Razinamas presented before 30th April may be given effect to from 31st March preceding;

and 2ndly. Notwithstanding this, the relinquisher shall be permitted to remove any standing *Vaisakha* crop on the land, and for such purpose to remain in possession till 5th June or such other date as the Deputy Commissioner may consider necessary for the removal of such *Vaisakha* crop.

2. The particular case referred to must be disposed of by the Deputy Commissioner as above.

CIVIL PENSION CODE.

Section 188.

Rule 1.

Page 103.

Substitute the following for the last sentence of this rule:—

The following Rules apply to the cases of officers of the late Indian Navy, re-employed under Government, who have commuted the whole, or a portion, of their Indian Navy pensions:—

- (1) If the re-employment of the officer commenced after the 31st of July 1883, his salary will be subject to a deduction equal to the amount of pension commuted, provided that his total emoluments shall not thereby be reduced to a less amount than the original pension, together with a quarter thereof. The officer will not be entitled by reason of such deductions to resume, on the termination of his re-employment, any portion of the amount of pension commuted.
- (2) If the re-employment of the officer commenced on, or before, the 31st of July 1883, his salary will be subject to deductions as above; but—
- (3) If deductions under Rule 2 have been regularly made during the whole period of his re-employment, he will be allowed to discontinue payment of the deductions when the aggregate amount deducted equals the capital value (calculated at the date of the commencement of his re-employment) of the amount of pension commuted.
- (4) An officer under Rule 2 will be allowed on the termination of his re-employment to resume the amount of pension commuted, provided that the full capital value, as described in Rule 3, has been repaid by the deductions from his salary. If such capital value has not been repaid in full when the re-employment ceases, the amount of pension commuted may be resumed on the officer paying up the balance, and with effect from the date on which he pays such balance.
- (5) An Indian Navy pensioner re-employed on or before the 31st of July 1883, from whose salary the deductions prescribed in Rule 1 have not been regularly made during the whole period of his re-employment, is not entitled to the concessions specified in the subsequent rules, and is subject to deductions under Rule 1 from the date on which it is known that such deductions are not being made, or such earlier date as may be determined by the Government of India.

12. If the Judge is the Judge of a Court subordinate to the Resident's Court, and he finds the charge established, and considers that the Advocate or Pleader should be suspended or dismissed in consequence, he shall record his finding and the grounds thereof, and shall report the same to the Resident's Court, and that Court shall proceed to acquit, suspend or dismiss the Advocate or Pleader.

13. Such report, when made by the Judge of any Court subordinate to the District Court, or by any Magistrate subordinate to the District Magistrate, shall be submitted through the District Judge or through the District Magistrate, as the case may be, who shall append to the report any remarks that he may think necessary and an expression of his own opinion of the case.

14. The District Judge or the District Magistrate may, pending the investigation and orders of the Resident's Court, suspend any Pleader charged before him or before any Court or Magistrate subordinate to him.

15. The Resident's Court, in any case in which an Advocate or Pleader has been acquitted otherwise than by an order of its own, may call for the record and pass such order thereon as it may deem fit.

16. The Resident's Court may also direct that any charge preferred against an Advocate or Pleader in any Court subordinate to it, shall be transferred for adjudication to itself or to any other Court of equal or superior grade to that in which the charge is preferred.

17. The suspension of any Advocate or Pleader shall be noted in the roll of Advocates or Pleaders in the Resident's Court, and notice thereof shall be sent to all Courts subordinate to that Court.

The accounts for the month of December 1885 have been examined and passed.

2. *Estimate and plan for widening Sivarampete Bridge.*

Resolved that the work of widening the Sivarampete Bridge be carried out at a cost of Rs. 1,000, Mr. Standish Lee having consented to give the Board a revised plan and estimate of the same.

3. *Estimate and plan for lowering the Yirangere Road in order to save hardship to cart traffic to some extent.*

Resolved that, for the present, a sum of about Rs. 700 be sanctioned to lower the Yirangere high road, between the Roman Catholic Chapel and Jail junction road, with a view of giving a gradient of 1 in 50 about that very high portion of the road.

4. *Read Docket No. 572, dated 14th January 1886, from the Vice-President, Bangalore Town Municipality, stating that there are no Convents within the Municipal limits of the City of Bangalore and forwarding copy of Section 189 of the Municipal Regulations on the subject.*

Mr. Standish Lee explained that a vault which exists in the Convent in the Civil and Military Station of Bangalore must have been opened before the Municipal Regulations came into force there, that, when the dead body of a nun was proposed to be buried in it lately, objections were raised for the same, and that, at Madras, there is a rule that a vault once opened could not be re-opened for 5 years and then too, with the previous permission of the Municipal authorities.

Resolved that, the vault being in effect a burial ground for a portion of the community and not intended for the interment of isolated cases on religious or other special grounds, the application for the opening of the vault *newly* within the precincts of the Convent in this Town is objectionable and cannot be entertained.

5. *Resolved* that the Banks carrying on trade within the limits of this Town be taxed according to the principle of taxation in respect to other trade, and not at an uniform rate of 15 rupees per annum, as is being done in the Bangalore City.6. *Resolved* that a Committee consisting of Messrs. Virasangappa, Puttanna, Raghavachari, Bommaiya and Ananda Rao be appointed to investigate the circumstances and extent of the oil-mongers' trade in this Town and to submit their report whether any and what reduction could be made in the rate at which the oil-mongers are, at present, taxed for their respective mills.

FINANCIAL DEPARTMENT.

ACCOUNT CIRCULAR No. 1652 OF 1886.

Transaction of Treasury work of the Taluks transferred to the Districts of Hassan and Chitaldroog.

As District Treasuries will not be opened in the newly constituted Districts of Hassan and Chitaldroog, till 1st May, the Comptroller has the honor to request that the treasuries of the taluks transferred to these Districts may, for transaction of all treasury work and remittance of treasure, continue subsidiary to the District Treasuries to which they were subordinate hitherto, the treasuries of the newly constituted taluks being placed under the District Treasuries noted in the margin. The Government having decided however that the receipts and disbursements of these taluks during the month of April should be incorporated with the Treasury accounts of Hassan and Chitaldroog, these treasury transactions should be entered in separate Registers opened in the name of the District Treasuries of Hassan and Chitaldroog, and the cash balances of these taluks on 1st April should be transferred to the account of the said Districts as remittances from one District to another. Two sets of lists of payments and treasury cash accounts will be prepared, one on account of these taluks and another for the Districts proper as constituted in the new organization, for submission to the Comptroller's Office, where the accounts for the Hassan and Chitaldroog Districts will be compiled. After 1st May when the District Treasuries of Hassan and Chitaldroog have been opened, copies of the first set of accounts together with the C accounts, ledgers, &c., received from the transferred taluks, should be forwarded to those treasuries.

2. Other District Treasuries having business to transact with the District Treasuries of Hassan and Chitaldroog, such as the issue of Public Service Transfer Receipts, local Money Orders and transfers of Savings bank accounts, will enter the transactions in their accounts against the District Treasuries of Hassan and Chitaldroog, but send the Transfer Receipts, &c., for encashment to the District Treasuries of Mysore, Kadur, Shimoga or Tumkur according to the transferred taluk to which the transactions may relate.

Proceedings of the Tumkur Town Municipal Board held on the 12th day of March 1886 at 3 P. M., in the Deputy Commissioner's Office, Tumkur.

*Present.*Mr. B. G. Krishnajiengar, *Vice-President.*

Mr. Ramadasappa.

Members.

The Revd. G. W. Sawday.

„ Venkatachar.

Mr. L. Srinivasaiengar.

„ Appanna Setti.

„ Sugappa.

1. Read accounts for the months of December, January and February last and passed with the exception of the following items :—

Reward for snake killing	Rs. 28 0 0 for December.
Do do	„ 11 14 0 for January.
Picota for the Municipal garden	„ 3 0 0
Contingencies	„ 4 0 0
Total...		46 14 0

It is observed that these expenditures are said to have been incurred out of Rs. 50 paid to the Municipal Overseer as advance in December and January. Mr. Assistant Commissioner Krishna Rao's explanatory memo on this subject and the Deputy Commissioner's notes thereon have been read by the members present, and it is resolved that as the above items have not been properly vouched, they should be disallowed and the Overseer required to refund the amount. The system of making advances to the Overseer is objectionable and it is ascertained from the present Vice-President that it has been discontinued since his taking charge of the office.

2. The mortuary returns for the above months have also been read and the following table gives the details of births and deaths in the Town during the period :—

		Births.		Deaths.	
		Male.	Female.	Male.	Female.
December 1885	..	4	7	2	2
January 1886	..	11	8	8	9
February „	..	5	2	4	3
Total...		20	17	14	14

As these figures don't call for any special remark, the returns are directed to be filed.

3. Read letter No. 5401—185, dated December last from the Secretary to the Dewan to the Deputy Commissioner and the latter's docket No. A, dated 11th March anent licenses to be issued to betel-leaf sellers in the Town.

Resolved that the same system as is in vogue in Bangalore Municipality be introduced into this Town also from 1st April next. From and after that date all betel-leaf sellers within the Municipal limits should obtain licenses from the Municipal Office on payment of one rupee per annum. No one should be allowed to vend betel-leaf without such license.

4. It having been brought to the notice of the members that the resolution passed on 10th November 1885 as regards the rent payable on shops in the flesh market works hardship on some, while it is disproportionately advantageous to others, since Rs. 2 per mensem are fixed for each of the first four occupied shops and 8 annas per mensem for the remaining 8 shops; it is resolved that from 1st April next, the shops should be rented out at a uniform rate of Rs. 1—8—0 per mensem. If for any particular shop two applications are received simultaneously, i. e., on the same day, the right to vend in that shop will be immediately put up for auction and given to the highest bidder, Rs. 1—8—0 being taken to be the minimum rate of rent chargeable on such shop. Rents are recoverable in advance for each quarter. It is further resolved that persons wishing to resign their shops should send in their resignation so as to reach the Municipal Office within office time on the last day of the quarter, otherwise they should be made liable for the rent of the next quarter.

5. Read application from the Revd. G. W. Sawday for the construction of a privy somewhere near the Petta Mission Boy's School or for the grant to him of a piece of land in that locality for that purpose.

Resolved that the Vice-President should inspect the locality with Mr. Sawday and see what can be done in the matter.

6. The Municipal Shanbhog having represented to the Board that he obtained no remuneration for making collections and that he had to pay for papers, &c., from his own pocket, it has been resolved by the members that Rs. 5 should be paid to him annually for contingencies. This being collection season, the payment should begin this year.

D. SITARAM RAO,

TUMKUR MUNICIPALITY.

The 13th April 1886.

Proceedings of the Town Municipal Board, Tumkur, 13th April 1886.

Present.

Mr. B. G. Krishnaiengar, Vice-President.
" Arnold, Assistant Surgeon.
" Venkatachar.

Mr. Ramadasappa.
" Appanna Chetti.
" Sugappa.

The Monthly accounts and the Mortuary return for March 1886 have been read and passed.

The following resolutions have been passed:—

1. That the estimate of Rs. 25 for the repair of the sweeper's shed near Balanakatte appears to be somewhat high; it may be caused to be revised and the repairs executed under the direction of the Vice-President.

2. That the complaint of the residents of Santépete with regard to the boiling of oil-seed (haralu) and throwing up of their refuse at and near Chinagaiya's bandy stand adjoining the Bangalore-Honnar road, thereby causing a bad smell injurious to the health of the neighbouring house-holders and to the passers by, being considered to be well founded, the oilmongers should be prevented from continuing the nuisance. The use of the bandy stand for the above purpose is not allowable and as the persons concerned have asked for time, they may be allowed two months to find out some less objectionable place on the condition of the refuse of the oil-seed being removed from the place so as to prevent the bad smell spreading.

3. That the petition of the toddy contractor, requesting that he may be permitted to remove his shop to a site said to have been purchased by him in Horapete, should be sent to the Commissioners of the Division with a view to their instituting necessary enquiry and reporting upon it before the meeting of the Board in May next.

4. That the levy of octroi duty except on cloths being considered an hinderance to the free exercise of trade (*vide* Dewan's Proceedings No. 1011—15, dated 17th September 1885), the Board is of opinion that the duties on the marginally noted articles may be abolished provided an equivalent income can be obtained from any other less vexatious source. The Board thinks that this is feasible by raising the shop and house taxes by two and one anna respectively on every rupee at present paid. It does not entail upon the people any great hardship since it is ascertained from the Shanbhog that one anna on every rupee is at present levied from such of the people as paid mohatarfa prior to the amalgamation of the municipal and mohatarfa taxes for the benefit of Talavars who are supposed to aid in the collection of the municipal taxes. So far as the Board is aware, this collection is unauthorized and it may be merged in the extra amount now proposed to be levied in lieu of the duties on the articles already mentioned. Besides the two merchant Municipal Commissioners, other merchants present at the meeting of the Board think that this increase of the house and shop taxes can be advantageously adopted. The collections for 1885-86 on the articles named were Rs. 302, and though the proposed increase on the *house and shop taxes does not fully cover the loss, yet considering the avoidance of annoyance to people it may be adopted.

Tobacco, betel-leaves, coconuts dry,
coconuts fresh.

*House tax Rs. 1,663.
Shop tax Rs. 1,000.

Pending final orders on the above proposal, the question of granting licenses to betel leaf and tobacco sellers will be held in abeyance.

5. That the proposal of Mr. Arnold, Assistant Surgeon, to raise the pay of the marginally noted Dispensary servants seems deserving of consideration.

	Present Pay.	Proposed Pay.
Surgery or Dispensary Cooly ...	5 0 0	6 0 0
Female Toti ...	4 0 0	5 0 0
Ward Cooly ...	5 0 0	6 0 0

The Board thinks that each of these may be given an increase of one rupee per month. Under existing arrangement, $\frac{2}{3}$ of the pay of these servants are paid from District funds the remaining $\frac{1}{3}$ being paid by the Municipality. Thus out of three rupees proposed to be paid as increase to the above mentioned servants, the Municipality will have to pay one rupee per month.

6. That in spite of certain big wells being excavated in the town to meet the present scarcity of water, the Board thinks it necessary to deepen some of the existing wells, whether public or private, situated in the town to meet the growing wants of the people. It is however proposed that grants should be made to private wells provided their owners consent to their wells being made use of by the people generally. Rs. 200 are proposed to be set apart for this purpose.

B. G. KRISHNAIENGAR,
Vice-President.

IV. Letter No. 232 from the Municipal President, Civil and Military Station, communicating the resolution recently passed by the Station Municipality, regarding the abolition of the octroi within their limits.

No. 253—133.

The 12th August 1886.

The following Postal Notice received from the Postmaster General, Madras, is published for the information of the public.

B. MURRY GUNGIAH,
Anche Bakshi.

Postal Notice, Madras, the 6th August 1886.

The attention of the public is invited to the fact that embossed envelopes impressed with a stamp of the value of 4½ annas have, for some time past, been sold at all Post Offices. These envelopes are designed mainly for private correspondence for the United Kingdom and other countries for which the single rate of postage, for any weight not exceeding half an ounce, is 4½ annas. The envelope is made of strong and opaque paper, and is sufficiently light to carry somewhat more than four sheets of good foreign note-paper of the size ordinarily used for private correspondence.

Those for whose correspondence the envelopes are suited, are strongly recommended to use them, as, in addition to having other advantages, they afford a perfect safeguard against the possibility of letters being destroyed, by either private servants or subordinates of the Post Office, for the sake of the adhesive stamps on the covers.

The overland embossed envelope is sold at all Post Offices for 4½ annas, the nominal value of the stamp.

Khazi Sahib (Vacant).

1. Resolved that all the papers, &c., in connection with the improvements to be effected in the Clarke Pettah, be made over to Mr. Nagesa Rao, Assistant Commissioner, who is fully acquainted with the details thereof from the beginning, and the Board will feel highly obliged by his kindly favoring them with a memo of what has been done in the matter.

2. It was resolved on a former occasion to entertain an Overseer to take the survey and levels of the Town with a view to taking up the question of drainage which is lamentably defective; and the Board suggest that the services of an official well qualified for the purpose be procured to undertake the above work with the least possible delay.

3. The Board learns with dissatisfaction the dilatory action on the part of the Municipal officials as regards the recovery of the outstanding balances amounting to Rs. 2,162—9—9 from Municipal defaulters, most of whom are, the Board consider, well enough to pay up their arrears. The Board are constrained to remark that this state of things calls for some change in the collection establishment, which requires to be placed on a better footing; so as to ensure a speedy recovery of the arrears above noted.

4. Read Shimoga Amildar's Ittilla No. 41, dated 9th instant, submitting a list amounting to Rs. 108—6—8 for remission.

No.	List No.	Name of Defaulters.	Amount.

6	32	Husen Shariff	4 0 0
7	33	Abdul Khadar	7 0 0
Total.....			43 14 0

It is clear from the details mentioned in the above statement that the defaulters, who have to pay Rs. 43—14—0, are in a position to clear off the arrears. Steps should, therefore, be taken at once to proceed against them by attachment and sale of their movable property according to the rules in force.

No.	List No.	Name of Defaulters.	Amount.

II. Estimate and plan of the proposed Band-stand in the Municipal Park.

Resolution.—The construction of a Band-stand in the Municipal Park be sanctioned, subject to the approval of Government. In the meanwhile the work to be commenced. The expenditure not to exceed Rs. 600. As no provision has been made in the Budget for this work, the sale proceeds of waste lands now held in deposit in the Savings Bank may be utilized, and provision made in next Budget to replace this. The plan of the proposed structure now laid before the Board be referred to the Executive Engineer, Palace Division, for any suggestion he may wish to offer.

III. Report from Mr. Khazi Abid Shariff Sahib, Municipal Commissioner, No. II Division, on the petition of the residents of Obaiya Lane to widen the same.

Resolution.—Sanctioned. The work to be carried out next year and provision be accordingly made in the Budget for that year.

IV. Statement showing the amount of compensation to be awarded for buildings and lands required to be taken up for opening a new road way from Avenue road to Ganigarpete.

Resolution.—In the above statement the amount of compensation is entered at Rs. 2,788, all of which sum the Board is not now in a position to pay. The work is however sanctioned, and the lands should be gradually acquired commencing with Kristna Shastri's house.

V. Application from Abdulla Sab for opening a Beef butchers' stall in the village of Korachara-palyam beyond the Fort.

Resolution.—The application be referred to the Municipal Commissioners, in whose Division the village is situated, for opinion.

Additional Proposition.

I. Proposed application to Government for assignment to the Municipality of the fines levied by Magistrates under Act V of 1861 (Police Act) and also for the transfer of local cess on Abkari revenue.

Resolution.—Approved. The above application to be forwarded to Government under a covering letter for favorable consideration. The Commissioners at the same time express their recognition of the consideration and liberality already shown them by the Government. The urgent and increasing demands under "Education" and "Charitable Institutions" make it difficult for the Board with its present income to meet these charges; hence the present application.

Rule IV.—(1.) The Collector may permit the contractor to import ganja from beyond the limits of the Civil and Military Station under passes in form C to be issued by him in communication with the authorities of the District from which the article is imported, provided the drug is of good quality and is not more than 18 months old. 1. Read demand, collection and balance statement of the Town Mohatarfa. The unrealized balance on the 31st July 1886 was found to be Rs. 1,822—3—3 due for the past 5 years. The accounts still remain unsigned by the Jamabandi Officer. Collection duty has been greatly neglected. Vigorous steps should be taken to clear off all arrears.

Resolved that the Amildar be requested to check the accounts and furnish a certificate of his having done so within 15 days.

The Mohatarfa Mutsaddi who has done nothing towards collection of arrears, although repeatedly warned, should be suspended, and a competent man put in his place temporarily.

The peons of the collection establishment should be allowed pay according to sanctioned scale. The present practice of allowing only Rs. 4 to Mohatarfa peons is objectionable.

2. Read accounts of Octroi collections for the months of June and July 1886. The Board observe with regret that as compared with the realizations in the same months last year, there has been a falling off of Rs. 214—4—4. The Octroi Department requires careful supervision from the responsible officials.

It is resolved that a good Paigasti Amin be employed on Rs. 10 or 12 for 6 months for prevention of smuggling, and to see that no fraud is practised by the Kolkars at the Octroi stations.

3. Mr. Venkatappa proposed that a bonded warehouse be provided for articles not intended to be locally consumed.

Read previous resolutions 3 and 4, dated 24th December 1884 and 10th January 1885, respectively, as well as the Dewan's Orders on the subject. (*Vide* his Proceedings No. 1129—56, dated 13th May 1885.)

Resolved that in accordance with the resolution of the meeting held on 10th January 1885 and Order No. 1129—56, dated 13th May 1885, no further action in the matter is necessary.

The meeting however wish to take some steps towards putting a stop to goods being left in the Sayerkatte for months together. There being no charge made for the custody of the goods, merchants find it a convenience to leave them in the Sayerkatte where they are well protected and to remove them whenever Sayerkatte is being used as godown by the traders.

It is resolved that goods be allowed to be kept without charge for 3 days, and if kept longer a fee of half anna per Rs. 100 per diem be levied on the value of the goods as per patti given by the merchants. In no case bales, &c., be allowed to remain in the Sayerkatte for more than three months.

4. Read Petition, Registered No. 63, dated 7th August 1886, from the merchants of the Pettah, and also heard them at the meeting. They pray for a reduction in the octroi rates on all articles except cloths, if the total abolition of these duties is not possible. They represent that the present rates are high and smuggling on a large scale is the consequence. Honest traders are prevented from establishing large mandis and wholesale shops in the town and the trade and prosperity of the town suffer in consequence. At present large quantities of tobacco, oil and cocoanuts are stored in the adjoining villages from which they are purchased by the townspeople or smuggled into the town by petty traders.

The meeting are sensible that there is great truth in the complaint of the traders. The yield of the duty on cocoanuts for instance is not even a small fraction of what one would expect it to be from the consumption of that article in the town. The present rate of duty is decidedly high and represents an *advalorem* duty of more than 16 per cent. It is a question if all these petty taxes may not be abolished and the revenue derived from them made good by having toll gates on all the roads and levying a tax on all carts and carriages passing into the town. This system would appear to be prevalent in all the Municipalities in the Madras Presidency. The Vice-President is requested to be so good as to collect information on the subject and place it before the next meeting.

5. The Marvadi merchants represented that they are subjected to much inconvenience by the charge of octroi duty on piece goods of European manufacture and prayed that either the duty on this item be abolished or the rates lowered.

Resolved that the practice in vogue in Bangalore and Mysore be ascertained by the Vice-President and the question brought up for discussion at the next meeting.

6. It was brought to the notice of the meeting that the number of convicts available for Municipal work had been reduced by 20 men owing to the transfer of 50 convicts to Mysore for carrying on works there. Of late years there have been a

gradual falling off in the number of convicts (as will be seen from the figures in the margin) on whom the Municipality had mainly relied for the construction and repair of roads and for general conservancy of the town. The Municipality has had therefore to resort to paid labor for works. Owing to the income being inadequate to meet the cost of keeping up a large conservancy establishment necessitated by the large area which the town covers, conservancy has not been as well attended to as is desirable nor can funds be found for drainage and for keeping up the roads. Lately 5 miles of Imperial and local fund have been transferred to the Municipality. The total length to be kept up by the Municipality is now 18 miles.

The President proposed the entertainment of a small permanent establishment like the old Public Works Department Khalihat for the proper up-keep of roads, drains, &c., as the employment of day laborers is not only more costly but gives room for fraud on the part of the minor officials.

Resolved that the establishment proposed may be entertained as follows:—

7. Read Shimoga Amildar's Itilla No. 46, dated 23rd June last, recommending remission of a portion of the rent of Bidrakatte kaval pasturage, as after the grazing had been let out to the purchaser, a part of the ground was appropriated for planting purposes and for sinking a well in the Maharaja's Park.

Resolved that a remission of Rs. 20 be granted to Havildar Srinivasa Rao.

8. Read docket No. 18 of 24th June 1886 from the Police Assistant Commissioner, Shimoga, asking for the cost of rain coats for the use of the Town Police Force.

The Board find that it was not allowed in any previous year.

Resolved that the fact be communicated to the Police Assistant Commissioner in reply to his docket above quoted.

9. Read Shimoga Amildar's Itilla No. 68 of the 15th ultimo, anent the imposition of scavengering cess on the houses in the river side street to meet the cost of establishment entertained to remove the night soil in that locality together with a statement of houses.

Resolved that the amount required to maintain the scavengering establishment, which is Rs. 200 be distributed over the houses ratably, the proportion being about 6 annas in every rupee of the house-tax now levied on them.

10. Read previous resolutions Nos. 5, 7, 1 and 3, dated 17th July 1879, 16th June 1881, 24th June 1882, and 10th April 1885, respectively.

The Board observe that the open space around the market was resolved to be reserved on sanitary grounds and on account of its proximity to the market. Later experience has shown that the market has not been utilized to the extent that was contemplated at the time of its construction. Though the locality is not central, and is at some distance from the main portion of the town, it is situated on high ground and is comparatively healthy. It must be the aim of the Municipality to attract the population towards this side of the town, and endeavour to get the market better utilized than at present.

With this object in view, it is unanimously resolved that a strip of 15 yards from the market compound wall be reserved for planting trees (a measure concurred in by the Civil Surgeon) and the remaining space be granted to applicants to build shops with good frontages. The matter of division of sites and the best way of disposing of them will be left to the Vice-President who is requested to see that they are not given out to men that cannot afford to build good houses. The adoption of this course, in the opinion of the meeting, will not only result in a decided improvement of the locality adjoining the market but will be the means of preventing nuisances for which the present openness of the place affords great facilities.

11. Read Petition, Registered No. 64, dated 7th August 1886, from Tukkaram, praying that the building site granted him lately near the market on condition of his paying a ground rent for it, be given him for a fixed price.

Resolved that the petitioner should be required to pay for the site on which he has built his house in proportion to the proceeds fetched by the adjacent sites at public auction.

12. Proposed by Mr. Shroff Manjappa, seconded by Mr. T. Venkatappa and unanimously resolved that with a view to supplement the resources of the Municipality which at present are inadequate to meet the demands of a rising town as noted in Resolution 6, Government be moved to sanction license fees from arrack shops in the Municipality and also the revenue assessment on lands lying within the town boundaries being credited to Municipal funds as is the case in other places.

It was also resolved that the Government be applied for leave to have the balance at the credit of the Municipality deposited in the Government Savings Bank, and also that the amount at the credit of the Municipality be reserved for starting drainage works on systematic plan and for the great kumbargundi project.

13. The Vice-President urged the necessity of making an additional appropriation of Rs. 2,000 in the current budget to meet the cost of establishment to be entertained as per Resolution 6 and of the Paigasti Amin as per Resolution 2 of these proceedings.

The Board note with much anxiety the yearly increasing strain on the Municipal funds. It will be

seen from the marginal figures that the authorities had originally the aid of large gangs of prisoners to lay out numerous roads, filling up the huge kumbargundi, fort ditches, &c., without much charge to the Municipality. The number of convicts now supplied to work in

the town is too insignificant to expect any substantial work from them.

On the other hand, the townspeople strongly urge the reduction of octroi rates as conducive to improvement in trade which is of great importance to a growing town like Shimoga.

Turning to the items of expenditure budgeted for, the Board cannot find their way to suggest any reductions except in one and that is, the cost of the Town Police. They find that under the circum-

stances above set forth, there are no means left at their disposal to meet the additional allotment applied for except the reduction of these charges.

The Board unanimously resolve that the Government be moved to sanction the transfer of the cost of the Police establishment to the Imperial Revenue Budget whereby great relief will be afforded to the Municipality. They are in hopes that with the Police charges thus saved and with the fresh items referred to in Resolution 12 they will be able to pay adequate attention to the requirements of the town, in the way of conservancy, roads, lighting, &c.

The Board are aware that a similar representation made in 1882 was negatived by the Government in its Proceedings No. 7312—316, dated 3rd March 1883, but the Board are in hopes that when the narrowing resources of the Municipality and expanding calls on its funds, as set forth in these proceedings, are considered, Government will be led to see that the present request is not unreasonable.

FINANCIAL DEPARTMENT.

COUNTERFEIT SILVER COINS.

Circular No. 1679, dated 7th December 1886.

District and Taluk Treasury Officers are reminded that agreeably to standing orders their returns of counterfeit silver coins, cut or broken, for the 12 months ending 31st December current, should be submitted to this Office early in January 1887, in the usual form.

The returns of the Taluks should be embodied as heretofore in those of the respective District Treasuries.

To—All Officers, Circular No. 1680, dated 9th December 1886.

The Comptroller has the honor to publish for general information the following Circular dated 3rd December 1886, issued by the Accountant General, Bombay, explaining the words "Actual Expense of keeping up Camp Equipage" used in Rule 1 of Section 27 of the Civil Travelling Allowance Code.

A. RANGASWAMIENGAR,
Comptroller.

Copy of Circular of Accountant General of Bombay.

Considerable misunderstanding appears to exist regarding the charges which are admissible under this rule. The following explanation is given with a view to assist officers in the preparation of their bills and to reduce the number of items disallowed in audit.

The rule empowers the Local Government to sanction the actual expense of maintaining "Camp Equipage" when it is necessary to do so, "Camp Equipage" being defined in the Code as "the apparatus for moving a Camp"; and the word "Camp", for the purpose of this rule, has been explained by the Government of India to include not merely tents but also tent furniture in the widest sense of "every thing necessary to an officer to enable him to live in Camp."

Accordingly, under the rule as thus interpreted the hire of carts, the keep of bullocks or other animals, if used solely for the transport of camp-kit of all kinds, is a permissible charge, but not the cost of means of transport for the officer himself nor the keep of servants.

RESOLUTION.

In the circular letter No. 89A., dated the 25th July 1884, it was requested that all future estimates of the probable or actual outturn of crops should be prepared in an uniform manner; and Local Governments and Administrations were asked with this object to use either the American or the Indian system. It was added that in the event of the Indian system being preferred, 12 annas should be employed to denote an average crop and one rupee to denote a bumper crop. The object which the Government of India had in view was merely to secure uniformity in the preparation of these estimates. Subsequently the Government of the North-Western Provinces and Oudh represented that the system ordinarily used in those Provinces is that under which an average crop is denoted by one rupee, a bumper crop being described as one and one quarter or 20 annas crop. A doubt having thus been thrown on the general applicability of the orders of the Government of India, a further reference on the subject was made to Local Governments and Administrations. From the replies received, it now appears that the system under which one rupee is used to denote only an average crop is in use in the whole or part of most Provinces, and all Local Governments and Administrations except the Governments of Bombay and Bengal have expressed their willingness to adopt it in their estimates. In the Bombay Presidency and in the Lower Provinces one rupee is generally used to denote a bumper crop; and the Governments concerned are therefore desirous of retaining the standard commonly in use.

2. The Governor-General in Council would be glad to leave the decision of the question to Local Governments if it were not for the uncertainty and inconvenience which must result from the preparation of returns by different standards. It is hoped that the returns will eventually be of considerable value to the mercantile public; but this can only be the case if an uniform method is followed in their preparation. Looking to the general tenour of the opinions expressed, it appears that less inconvenience will result from the adoption in Bombay and Bengal of the system under which an average crop is denoted by one rupee than from the introduction into other parts of India of the system under which one rupee denotes a bumper crop. His Excellency in Council trusts therefore that with the permission of Local Governments and Administrations crop forecasts may in future be prepared in all Provinces on the former system.

ORDER.—Ordered, that a copy of this Resolution be forwarded to the Local Governments and Administrations noted in the margin.

P. N. PURNAIYA,

REPORT ON THE HUNSUR SILOS.

During the months of April, May and June 1884, four Silos were constructed at the Hunsur Public Cattle Depot of the following dimensions:—

No. 1.—Hunsur North Silo; length 32 feet, breadth 12 feet, depth 8 feet, cubical contents 3,072 feet.

No. 2.—Hunsur South Silo; length 32 feet, breadth 12 feet, depth 10 feet, cubical contents 3,840 feet.

No. 3.—Kodigahalli North Silo; (dimensions the same as No. 1).

No. 4.—Kodigahalli, South Silo; (dimensions the same as No. 1).

The sides and bottom were levelled, and a cement, made of 2 parts finely sifted sand and 1 part chunam, was spread on to the thickness of about an inch.

Silo No. 1 was filled on 1st and 2nd November 1884 with $14\frac{1}{2}$ acres khardu grass and 1 acre of cholam; the grass was a very poor crop and was cut while in flower.

An elephant was used to trample down the grass as it was put into the silo and after filling it up level with the ground a layer of dry grass about 4 inches thick was put on the top, and the whole again firmly trampled down.

Next came a layer of Honge (karanj) branches cut and placed so as not to interfere with the sinking of the grass, and on the top of these was placed about $34\frac{1}{2}$ tons of stone, or a little over 200 lbs. to the square foot; then the silo was covered with about a foot of dry earth which was well rammed into the holes between the stones.

An iron gas pipe was forced down to the bottom at the centre of the silo, and the temperature taken daily; it gradually rose until the 19th November, when it reached its highest point, viz. 113° , and after the 19th November it gradually decreased.

Silo No. 2 was filled on 2nd, 3rd and 4th November 1884 with khardu grass, but layers of marwadi, sunti, hanchi and hariyali grasses were also put in for experiment; this silo was trampled by the elephant and weighted in the same manner as Silo No. 1.

Silo No. 3 was filled in the same manner, but was weighted with earth only.

Silo No. 4 was filled gradually, a layer of green grass was put in every other day and it took about ten days to fill it; this silo was weighted with earth only and was not trodden down by the elephant.

All the silos were roofed in with a rough thatch to protect them from rain.

The grass was cut in fine weather, but that cut and put into the silos in the early mornings was soaking wet with dew.

Silo No. 1 was opened on 30th March 1885, and the grass was found to have sunk down about 3 feet, leaving 1,920 cubic feet of solid fodder; the whole of the contents were perfectly good with the exception of about 3 inches round the sides, which was mouldy.

As an experiment the ensilage was offered to cows, bullocks and horses and they all ate greedily.

This ensilage was issued to the working and other bullocks at Hunsur from the 30th March to 25th May 1885 at the rate of 30 lbs. per head, they ate it readily and up to the present time they are in excellent condition; in fact the working bullocks are in better condition than they have been at any time during the last 2 years; this improvement is clearly attributable to their being fed on ensilage, as they have had no grazing for the last 2 months.

Silo No. 4 at Kodigahalli was opened on 20th April 1885 and was found to be perfectly good, with the exception of about 10 inches at the top, which was mouldy, the weight per cubic foot was only 23 lbs or a total of 19 tons, 14 cwt and 32 lbs, being 14 tons, 9 cwt and 48 lbs less than the contents of silo No. 1, which is of the same size and weighed 40 lbs per cubic foot; (this clearly shows the benefit of employing an elephant in treading down the grass); this ensilage was issued to the Home herd during the month of May 1885.

Silo No. 2 was opened on 26th May 1885 and was found to be equally good, if not better than the others; it weighed 40 lbs per cubic foot and had sunk down $3\frac{1}{2}$ feet, leaving 2,496 cubic feet of solid fodder; this is at present being issued to the working and other bullocks at Hunsur.

Silo No. 3 at Kodigahalli has not yet been opened, but is reserved for the young steers which will be taken over from the Amrut Mahal Department this year; the contents of this silo may be estimated to weigh about the same as Silo No. 1.

Although the ensilage was found to weigh about 40 lbs per cubic foot on being opened, it was proved by experiment that a great loss of weight took place by drilage, and credit was given for the ensilage in the stock return for Silo No. 1 at an average rate of 30 lbs per cubic foot; No. 3—30 lbs per cubic foot; and No. 4—20 lbs per cubic foot, a statement of the result of the experiment made is appended.

The work of excavating and roofing the silos was done by the cattle attendants, and the only expenditure entailed was the sum of Rs. 185—6—0 paid to coolies for cutting the grass.

A statement showing the cost per ton is also appended.

The result of these experiments is in most respects highly satisfactory.

If the fodder is compared with the hay made of grass from the same paddocks, the superiority of the ensilage is unquestionable; cattle which refused the hay ate the ensilage with avidity and in many cases preferred it to paddy straw when both were placed within their reach.

In my opinion the object to be attained is to produce sweet ensilage on the system of Mr. Fry, whose experiments during the past 2 years have shown that it is by permitting the temperature to rise to or over 120° F., that fermentation is arrested and this is attained by gradual filling of the silo. Complete exclusion of air is necessary to preserve the fodder, but is not the primary cause of averting fermentation.

When Silo No. 1 was opened, the ensilage was entirely devoid of any bad smell, but when cut out in blocks it soon became offensive, and after the silo had been opened a few days a very powerful odour was emitted. When the ensilage was spread out immediately and dried as hay, no bad smell was perceptible.

The loss by evaporation as stated in the return appended shows that 45 lbs of fresh ensilage contains about 31 lbs of water. Complete evaporation seems to have been effected in about a couple of days, after which, the weight was reduced to 14 lbs per cubic foot.

The expenditure was entirely for cutting the grass by coolies, which will be reduced when the mowing machine indented for next year is received.

It is proposed to repeat and extend these experiments during the present year, when an ensilage will also be made to test the feeding capabilities of ensilage as compared with hay and straw. A number of cattle fed upon each description of fodder.

That the preparation and filling of the silos was very carefully carried out by

Report on the Silos excavated and filled on the Farm, Ramban land, Herur and Nademarinpur Kavals and the results when opened.

Silo No. 2.—Was excavated and got ready by the 24th October; the filling was commenced on the 1st, early in the morning; three feet of good hariyali mown off Paddock No. 4 was put in for the first time and was well trampled down by women. After this the sorghum grown in Paddock No. 3, an area of 4 acres, was cut and chaffed in the chaff cutter and put in, being gradually trampled by women. Filling work was done on the 25th, 26th and 27th, the last layer being good hariyali; the closing of the silo was done on the 28th, and as the mass sank it was attended to; the earth excavated from it for the weighting of the mass. The dimensions are 14 feet x 11 feet x 10 feet and the contents 1,540 cubic feet. On the morning of the 19th of March, the silo was opened, the earth covering on top being removed; the mass had sunk two feet, equivalent to 308 cubic feet (14' x 11' x 2'). On weighing the bamboo mat laid over the silage before weighting with earth, it was found that the first layer of hariyali grass was of a dark green color and after airing out some of it, it was found to be like made hay. The sorghum was found to be also fresh and green; containing a good deal of sap were given to the mares and foals; the hariyali was eaten with avidity by them, but they refused the sorghum on account of the moisture and had it since. The cattle were next tried and every one to which it was offered ate it. The quantity of sorghum and hariyali in this silo was weighed; of the former there was 16,168 lbs and the latter 5,730 lbs, a total of 21,898 lbs. Four days after opening it, it was found to contain minute worms, which had been deposited by flies through the bad smell, and since the 23rd March it is being used for the cattle. The cost of excavating this silo was Rs. 5—4—0 as the bottom contained soft rock, and the cost of cutting, chaffing, trampling and weighting was Rs. 11—8—0, total Rs. 16—12—0.

Silo No. 3.—Excavated on the Ramban land, opposite the village of Maisanahalli on the 2nd November; the filling commenced early on the morning of the 5th when the grass was fresh. The filling was done on the 5th, 6th and 7th with the best hariyali; on the 8th the mass was weighted with earth excavated from the silo.

In conclusion, I beg to report that the results obtained from the silo experiments tried this year have indeed been very satisfactory, and the problem has now been solved, that all surplus grasses of any kind can be safely preserved under ground. If cattle owners took an interest in the welfare of their cattle, they will during a time of plenty store large quantities, which would during seasons of drouth be a blessing to their impoverished cattle when no fodder is to be had at all.

من پرچہ گزٹ گورنمنٹ ہندوستان جانیوری عیسوی مقام کلکتہ

کے سال سے سرکار ہند کی توجہ وقتاً فوقتاً اس امر کی مقتضی ہے کہ معظمہ کے سفیرین
اہل اسلام کے لئے جو تکالیفات و زمینیں پریشیں ہوتے ہیں ان کی تخفیف کے لئے
بہتر امکان کوشش کیا جاوے۔۔۔۔

خصوصاً غریب مسلمانوں پر جو راہیں ہوتے ہیں تحقیق کہ ان تکالیفات کا اثر بُرا

طور پر دخل تصرف ایسے امیرین کہ جسکو ہند کے مسلمانوں کی ایک بڑی جماعت
شرعی فرائض جانتی ہے۔۔۔۔

سنہ عیسوی میں ایک اطلاع برصغرت ہر صاحب سکرٹری آف اسٹیٹ بایں
مضمون کہ سرکار قسطنطنیہ سے احکام جاری ہوئے تھے کہ ہر مسافر کے پاس
جو وارد جہ ہو پاس پورٹ کار ہنا ضرور ہے گو کہ وہ مسافر تری ہو یا کوئی اور
قوم کا اور جس کسی کے پاس پاس پورٹ نہ ہو وہ حجاز کے بنادر سے پلٹاؤئے جائیگا
سرکار ہند بجز از مشورت بالوکل گورنر مینسٹرون و اڈمیسٹریٹیشن یہ تجویز ٹہرائی تا احکام
ڈکٹم گورنر مینٹ بحال امکان واسطے اہل ہند کے جو راسی مکہ معظمہ ہوں ناگوار نہ ہونے کے لئے

ایسا ایک قانون متحر کیا جاویں کہ ہر ایک عازم حج کو غیر مشروط پاس پورٹس
فقط ہندوستان کے بندر و پر جہان سے کہ مسافران سوار جہاز ہونے پر ایک سرگرم
کے دارالہکومت اور ملکی رجواڑوں کی پلوٹیکل اجنسیوں میں دیا جاویں اور یہ بندوبست بھی
ہو کہ غیر معمولی پاس پورٹ دول خارجہ کی رعایا کو بھی دیا جاویں یعنی اہل کاشگار
روس ترکستان و افغانستان وغیرہ جو ہند کے بندر سے واسطے حج کے سوار جہاز
ہوں اور ان پاس پورٹوں میں اس مضمون کی شرح تھی کہ سرگرم ہند ان لوگوں کی جو
پاس پورٹ رکھتے ہوں کوئی طور کی ضمانت نہیں اور گورنر جنرل ان کو نسل ان لوگوں
کی پہچانت کا کوئی دوسرے سرکار کے اہل کاروں کے لئے جواب دہ نہیں علاوہ بین
بلحاظ کثرت مسافران جو ہر سال ہندوستان سے رہی مگر متعلقہ اور وارڈ بھی سفر مکہ معظمہ
ہوتے ہیں ایک سلمان پروٹکسٹ آف پلگمرس نے مستحفظ حاجیان اس بند میں مقرر ہوا
تاکہ مکہ جانے والوں کے لئے ہر ایک طور کی اطلاع اور مدد درباب سفر عجز از جہاں مکان محل

قلم و قلم ترکیب مذکور بالا اختیار کے جب سے اور کوشش میں سرگرم ہند سے واسطے
بہتری دستور العمل آمد و رفت حاجیان ہند ملکی مسافروں کے جہازوں کی آرامی کے
خاص باتوں میں اصلاح دینے کے لئے ایک نمبر شدہ عیسوی اور اس اگٹ کے
بعض قانون کو بدلانے سے جو مسافروں کی خبر گیری اور پاکی کے باب میں جو حاجیان
کے جہازوں کے لئے لازم ہیں جاری ہوئے ہیں اور یہی قانون بجا مکان ان قانون کے
ساتھ جو واسطے اصلاح اور بہتری ان لوگوں کی جو جلا وطنی اختیار کر کے انگریزی یا فرنگی
علاقے کے دریائی ملکوں کو جاتے ہیں جو جاری ہے ملا گیا ہے اور ہر طرف شایع ہو کر
تقریباً ہر سال اس قانون کے رد سے جس جہاز میں کہ تلو حاجیان کا عہد ہو تو لازم

ہوٹاری کر ایک صداقت یافتہ طبیب اس جہاز کے ساتھ حاجیوں کے ساتھ
 لیے ہو اور ہند کے حاجیوں کی غیر خواہی کے لیے جب تک وہ ملک جہاز میں رہیں
 ایک میس کو مستقل یعنی اپنی مقام جدہ پر سرکار ہند کے جانب سے ایک مقرر ہوا جس کا
 یہ کام ہے کہ اہل ہند کے بیہودی و غیر خواہی کے لیے مشغول رہے اور واسطے اس
 راحت حاجیوں کے خصوصاً جو سرکار قسطنطنیہ سے قرآن تین - یعنی مستقل
 پیادوں کے سواروں کو روک رکھنا جو تندرست جہاز پر جانے نہ دینا جو حاجیوں
 کو رکھتے ہیں ایک اپنی بطور نگامی مقام جدہ اور کامران میں مقرر رہے اور ایک
 دوسرا خانہ واسطے حاجیان ہند کے جدہ میں بنا کیا گیا ہے اور جو اس کے یہ
 راستے ہے کہ واسطے درستی معاملات قرض حاجیان و رہن وغیرہ جو بطور ضمانت
 ہو یعنی میں اور سرکار کا یہ ارادہ ہے کہ کوکل بمبیسو کو نسل سے یہ حکم صادر ہو کہ
 آئندہ حاجیوں کا مال گروہ کرنے کے لیے نقطہ وہ لوگ کو اجازت ہو جو لیسنس
 ہوں اور بعضے تہذیبات ہی مقرر ہو گئے ان کیسٹنس والوں کے لیے جو یا بند قانون
 نہواور یہ کاروائی محل میں آنے سے شک نہیں کہ حاجیوں کے لیے ہر امر میں جو یہ
 اور فراغت سفر میں حاصل ہوگی - اور اس باب میں جو مراسلات میراجسٹری کے
 سکریٹری کے ساتھ جاری ہے اس امر کا بحث ہو کہ آیا کہ یہ منظور جانے والوں کو لازم
 ہی کہ اپنے آنے کے کا خرچ بطور امانت رکھا جاوے کیونکہ سرکار ہند کا یہ خیال تھا
 ترکیب بہت کچھ تکلیف و خانہ خرابی کی مانع ہونگے لیکن کوکل گورنر مینٹ اس
 مطابق ہونے سے براین ملاحظہ کہ سرکار کے ایسے دخل دینے سے شاید لوگوں کے دلور
 اور کچھ خیال نہ آجاوے لہذا گورنر جنرل ان کو نسل سے یہ فیصلہ ہوا ایسا
 تین مصلحت نہیں اور اس سنی وقت ایک اشتہار عام انگلینڈ کی فارسی زبان

اس مضمون کا شائع ہوا اور کہ اس اشتہار سے جتنائی گئے کہ جو لوگ کچھ کے
 زعمتوں کو قبول کر رہی تھے مہم عظیم ہوتے ہیں ان کے لئے سرکار عثمانیہ سے کم سے کم
 دنوں روزگار ان تین جنریرہ کامران میں لگایا جائیگا جس میں کچھ مبلغ بھی
 ان سے لیا جائیگا اور اس میں مسافران اپنے کھانے پینے کے خود زموار
 ہیں اور اس بات کا اثر ان کے دل پہ لگایا کہ بغیر اس کے کہ یہ کم جس کے ساتھ تین سو
 سو سیر نہ ہوں کہ یہی سمرطہ مہم کا خیال کریں تاکہ قرآن تین کا صبح بھی اور چریے
 سے ملے آئے جانے اور ہر ہندوستان آئے کفایت کرے۔

قلم سوم ۱۵ اکتوبر ۱۹۰۱ء عیسوی میں ایک خط سرکاری مسٹر تھامس کوک انڈین
 اس طلب کے کہ کہیں مذکور حاجیوں کو ہند سے کھینچا جائے اور واپس لانے تیار ہوں یا وہ
 تقریب کے روپے جو دوسرے ایسے قسم کے کاموں میں جو انکو حاصل ہوا اور جو یہ کامیابی
 ان کے کارروائی کا نتیجہ ہونے سے صاف ظاہر ہے کہ کہیں مذکور کو خاص اس امر
 کی لیاقت ہی کہ حاجیوں کو ان کے منزل مقصود کو پہنچا کر واپس لانے میں سرکار
 کو بڑی مدد حاجیوں کو آرام سے لانے لیا جائے میں ہو گے جواب تک ممکن نہ تھی
 مسٹر تھامس کوک انڈین کو اطلاع دی گئی کہ اگر وہ ضروری تیاری کئے تو
 گو نہ جہل بہادران کو نسل اپنے مقدور موافق انکی کمک کریں گے مسٹر تھامس
 کوک انڈین اب سرکار ہند کو اطلاع دیے ہیں کہ چند شرطیں دے برامین و
 ان حاجیوں کے اور ہندوستان کے مابین لانے لیا جائے تیار ہیں اور گو نہ جہل
 کو نسل بعد از غور کے اور مراسلت ساتھ مسٹر۔ جے۔ ایم کوک کے یہ رائے
 جتے ہیں کہ انکی شرط قابل قبول میں شرطیں ہیں مسٹر تھامس کوک انڈین تمام
 کے حاجیوں کے لئے اچھٹ متحرک کا حوالے اور کاف اور خزانہ خان کے

SUMMARY OF THE WEATHER REPORTS FOR DECEMBER 1885 AND JANUARY AND FEBRUARY 1886.

The fine weather which had prevailed in the last week of November continued during the first week of December throughout the whole country and for the first ten days in Northern India. In Madras light showers set in on the 7th, and the rain-fall extended and became heavier on the two following days. From the 10th to the 15th there was but little rain in the Peninsula though some fell in Central India, but for about ten days subsequently to the 15th, there was fairly general, and in places heavy, rain in Madras.

In Upper India the weather became unsettled about the middle of the month, and the winter rains began unusually early. Moderate showers fell in the Eastern Punjab and the Gangetic Valley, and falls of snow at the hill stations of the North-Western Himalaya, on the 12th and the 13th, and heavy showers both in North-Western India and the Nerbudda Valley on the 18th and 19th. After the passage of the depression which caused the last mentioned rain-fall, pressure rose quickly and the weather became fine throughout the whole country. In Guzerat, Sind and the Konkan the rain-fall of the month was either nil or unimportant, but in all other parts of the country the amount exceeded the average, especially so in North-Western and Central India. This unsettled weather brought about very low temperatures at times, and the mean temperature of the month was generally 2° or 3° below the average.

In January the weather of Upper India was even more unsettled than in December, and several disturbances appeared over the Punjab. That of the 19th was exceptionally intense, and on that day pressure in the Punjab was from 0.25 inches to 0.37 inches below the average of the month. More than double the average amount of rain fell in the Punjab, and a considerable excess in the Trans-Gangetic districts of the North-Western Provinces, but it did not apparently extend beyond those regions, deficiencies being reported from almost all other parts of India. Western India from Guzerat to the Deccan was rainless throughout. Like December, January was a cool month, the only exceptions being Madras and the more southern districts of the Bombay Presidency, where there was a slight excess of temperature. In the Punjab it was from 2° to 4° below the average.

February was, on the whole, a more settled month than either December or January, and the barometric mean of the month was almost everywhere above the average. A barometric disturbance affected North-Western India on the 16th, but though the pressure differences were considerable and the winds very high at some stations, there was but little rain, and the total fall of the month in this, as well as in nearly all other parts of India, was below the average. Over the greater part of India there was no rain, but in the Carnatic and British Burma there was a slight excess, and in Assam and Cachar about half the average fall. In the absence of rain, temperature rose above the normal at several of the Peninsula stations and in Guzerat, but elsewhere the cool weather, which had characterized the two preceding months, continued, and in places, relatively to the average, the depression of temperature was even more marked. At Dera Ismail Khan it was as much as 5° . Dry north-westerly winds prevailed throughout a great part of the month, and except in the extreme north-west, humidity was considerably below the average throughout India.

The final column of the following table shows that, except in Bengal and Assam and in Western India, the rain-fall of the three months has been above the average. Except in the Punjab, the North-Western Provinces and the Carnatic, the whole of this excess is attributable to the exceptional rain-fall of December.

The following table shows the amount of rain and the difference from the average during the months of December 1885 and January and February 1886, according to districts as far as is indicated by the telegraphic reports:—

Districts.	Average rain-fall in December.	Difference from the average in December 1885.	Average rain-fall in February.	Difference from the average in January 1886.	Average rain-fall in February.	Difference from the average in February 1886.	Total difference for the three months.

No. 593.

Mysore, the 5th February 1886.

In exercise of the powers conferred upon him by Act II of 1886, and of all other powers enabling him in this behalf, the Honorable the President in Council is pleased to make the following rules under the said Act:—

1. The time within which amounts deducted from salary, annuity, pension, or gratuity paid by a local authority under section 8, sub-section (1), of the Act must be paid to the credit of the Government of India is fixed at one week from the date of payment of the salary, pension, annuity or gratuity. The payment to the credit of the Government shall be made by remitting the amount to the Collector with a statement giving the following particulars for each person from whom the tax has been realised:—

- (1). Name.
- (2). Period for which the salary has been paid.
- (3). Amount of salary paid.
- (4). Amount of tax.

2. The return required by section 10 of the Act shall be in Form A hereto appended.

3. Any sums, such as payments to regimental mess or band funds or the like, compulsorily stopped from salary by the orders, or with the approval, of Government, shall be deducted from the salary previous to assessment.

4. A deduction made from the amount of salary, pension, or annuity liable to assessment on account of a payment made to a life insurance company must be supported by the receipt of the insurance company for the payment and a copy thereof. When the deduction is claimed by a servant of the Government, or of a local authority, the officer paying the salary, pension, or annuity will compare the original receipt with the copy, return the original, and attach the copy to the salary, pension or annuity bill if the payee is a Government servant, and to the statement forwarded with the amount of the tax realised under Rule 1, if the payee is a servant of a local authority.

Where the Collector is satisfied that the original receipt of the insurance company cannot be produced without an amount of delay, expense, or inconvenience which, under the circumstances of the case would be unreasonable, he may accept such other proof of the payment of the premium as he may deem sufficient.

5. The amounts exempted from assessment by section 5, sub-section (1), clause (g) of the Act and by rule 4 above shall not be deducted from income for the purpose of determining whether the income is liable to the tax, or of determining the rate at which the tax shall be levied.

6. The amount to be assessed under section 24, sub-section (1), of the Act on account of a building occupied by the owner thereof shall not in any case exceed 10 per cent of the aggregate income of the owner derived from all sources. It will not, however, be understood from this that a maximum of 10 per cent of the aggregate income of the owner is to be considered equivalent to the letting-value of his house. The letting-value will, in all cases, be ascertained on the best data available, in view of the circumstances of the locality in which the house is situated.

7. Salaries, annuities and pensions paid in April 1886, though on account of March 1886, are liable to the tax.

8. After the close of the year of assessment each Accountant General or other auditing officer shall submit Return No. I in the form hereto appended to such officer as the Local Government may direct.

9. The certificates referred to in the second column of Part III of Schedule II of the Act shall be in Form B or in Form C, hereto appended.

10. Any claim under section 5, sub-section (1), clause (c) of the Act to exemption from the levy of the tax on the interest of securities employed solely for religious or public charitable purposes within the meaning of that clause must be supported by a certificate from the Collector, which shall be in Form D hereto appended.

11. In the case of securities, the interest on which is payable by the Government of India, the amount deducted on account of the tax under section 13, sub-section (1) of the Act shall be paid to the credit of the Government on the same day as the payment of the interest is made.

12. In the case of securities, the interest on which is not payable by the Government of India, the amount so deducted shall be paid to the credit of the Government within one week from the date on which interest is paid. The person deducting the amount should pay it to the credit of the Government by remitting the amount to the Collector with a statement showing the following particulars:—

- (1) Name of owner.
- (2) Description of security.
- (3) Number of "
- (4) Date of "
- (5) Amount of "
- (6) Period for which interest is drawn.
- (7) Amount of interest.
- (8) Amount of tax.

13. Interest on securities belonging to Service Funds shall not be assessed.

14. After the close of the year of assessment each Accountant General and Comptroller shall submit Return No. II in the form hereto appended to such officer as the Local Government may direct.

15. In calculating the amount of tax payable the amount due on a fraction of a rupee shall be neglected. Thus the tax to be realised on a monthly salary of Rs. 166—10—8 is Rs. 4—5—2 only.

16. All public servants are forbidden to make public or disclose, except for the purpose of the working of Act II of 1886, any information contained in documents delivered or produced with respect to assessments under Part IV of the said Act, and any public servant committing a breach of this rule shall be deemed to have committed an offence under section 166 of the Indian Penal Code.

17. Power to make further rules is hereby delegated to the several Local Governments.

18. Each Local Government will prescribe forms of registers to be maintained by Collectors and others for the purpose of showing the demand and collections of the tax, the various classes of incomes assessed, and the working of the several provisions of the Act.

19. After the close of the year of assessment each Local Government will submit to the Government of India in the Financial Department a report on the working of the Act.

20. The following returns in the forms hereto appended will be submitted with that report:—

No. 595.

From—The Secretary to the Government of India, Department of Finance and Commerce.

To—All Local Governments and Administrations.

I am directed to forward copies of the rules made by the Honorable the President in Council under Act II of 1886, and to communicate the following remarks and instructions.

2. The President in Council desires to impress upon the Government of you his great anxiety that special care should be devoted to the assessment and working of the Act especially during the first year of its operation. He attaches the greatest importance to the necessity of exercising caution and moderation in the introduction of the measure. The Government of you is authorized to entertain such establishments as may be required to ensure that the assessment shall be carefully and equitably made. Money spent in this way will, the President in Council feels assured, give a full return, by preventing inequitable assessments and discontent and by securing the smooth working of the Act.

3. The temporary employment in the working of the Act of persons who do not hold permanent appointments under Government should be forbidden, and all officers appointed for this purpose should be chosen from the permanent staff. A sufficient and trustworthy staff is specially requisite in the Presidency Towns, where so large a portion of the total tax will be assessed, and His Excellency in Council trusts that especial care will be exercised in the selection of the officers charged with the supervision of the work in these towns. It may also be expedient to place an officer of experience on special duty in the Province under the charge of the Government of your charge to supervise the work during the whole or a portion of the coming year, and the President in Council authorizes the Government of you to take this step at once should it be deemed desirable to do so.

4. The President in Council desires that in making the new assessments the results of the assessments made under the License Acts should be utilized to the utmost possible extent, and that they should be accepted, as far as possible. Persons inadvertently omitted under the License Tax will, however, be brought on to the list of assessees.

5. In framing rules under the Act the Government of India has intentionally avoided dealing with details, as it is believed that Local Governments are in a better position to frame rules which will suit the varying circumstances of different localities, and as it is undesirable to attempt to lay down general rules on minor matters, applicable to all India, until at least one year's experience of the working of the Act has been obtained.

6. Power has been delegated to Local Governments to make additional rules, and in this connection I am to call the special attention of the Government of your special attention to the provisions of section 18 of the Act which entrust to Local Governments a wide discretion in the making of rules regarding notices either requiring assessees to pay the tax to which they are liable, or calling on persons liable to pay the tax to furnish information regarding their incomes. By means of these provisions it is hoped that the working of the tax may be the better adapted to the circumstances of different parts of the country.

Each Local Government must, of course, consider the special requirements of the territories under its control, and frame such rules as may be suitable to meet those requirements, but the President in Council, with a view to the eventual removal of any unnecessary differences in the procedure in different Provinces, desires that the Government of ^{you} should forward to all other Local Governments and to the Government of India in this Department a copy of any rules which it may issue.

7. Section 3 (4) of the Act declares the exemption from assessment of travelling, tentage, horse or sumptuary allowance, or any other allowance granted to meet specific expenditure, to be subject to any rules which may be prescribed. This power to make rules was reserved in order to prevent any abuse of the exemption by changing the designation of a portion of salary or otherwise. The power need not be exercised unless it appears that attempts to abuse the exemption are being made.

8. The only condition or restriction prescribed under the power conveyed by section 5 (1) (g) of the Act is that contained in rule 5, providing that the exemptions from assessment of fund subscriptions and life insurance payments shall not be taken into account in deciding whether the income is liable to the tax or in determining the rate at which the tax is leviable.

9. It will be observed that salaries, annuities, and pensions paid in April 1886 are liable to the tax even if they are due in respect of preceding months. Payment in advance does not extinguish this liability.

10. The Rules prescribe no conditions under section 9 (2) of the Act regarding arrangements for the collection of the tax from their employés by non-official employers. This proviso was inserted in the Act in order that employers may be induced by the remission or return of a small portion of the tax, and in order to save their employés from avoidable trouble, to undertake the collection of the tax and thus relieve Collectors of the difficulty of dealing directly with a large number of assesseees. The intention should be explained to Collectors with instructions that they should endeavour to make such arrangements whenever it may appear feasible; but it will, of course, be understood that no pressure is to be put upon employers to fall into an arrangement under this section.

11. It will be observed that the Rules contain no provision for payment by instalments of the tax leviable under Part IV of the second Schedule. I am to explain that this is left by the President in Council to the discretion of the Government of ^{your discretion}; and that it is the desire of the Government of India that every reasonable facility should be given in the matter, the maximum number of instalments, however, in no case exceeding four.

12. No rules have been prescribed regarding composition for the tax under section 31 of the Act. The Government of India trusts that the principle of composition may be extensively adopted, as it is evidently calculated to obviate friction and trouble in assessment, and the President in Council will be glad to have as early an expression as may be convenient of the opinion of the Government of ^{your opinion} whether any such rules need be made by the Government of India, or whether they should be left to the Local Government concerned, and in the former case what rules the Government of ^{you propose} proposes.

13. The number of companies being few, and it being desirable to have fuller information regarding the assessment of companies than is contained in the general published return, the President in Council requests that the Government of ^{you} will forward, each year, separately from the Returns prescribed in the Rules, a return showing the designation and assessment of every company in the territories subject to the control of the Government of ^{your control}. This return should not be published.

14. I am also to invite suggestions for the improvement of the classification adopted in Return No. V. These suggestions should if possible reach the Government of India not later than the end of December next, in order that, if any change in the form of the Return is decided on, it may be prescribed in time for adoption in the Reports of 1886-87. The experience gained in making the assessments under the Act may enable Local Governments to propose a preferable classification.

15. The reports on the working of the Act in 1886-87 should be specially full and complete.

Secy. to the Govt. of India.

Government of Mysore that an executor or administrator has paid debts due from the deceased to such an amount as, being deducted out of the amount of value of the estate, reduces the same to a sum which, if it had been the whole gross amount, or value of the estate, would have occasioned a less court fee to be paid on the probate or letters of administration granted in respect of such estate, than has been actually paid thereon under this Act, the Government of Mysore may return the difference, provided the same be claimed within three years after the date of such probate or letters.

But when, by reason of any legal proceeding, the debts due from the deceased have not been ascertained and paid, or his effects have not been recovered and made available, and in consequence thereof the executor or administrator is prevented from claiming the return of such difference within the said term of three years, the Government of Mysore may allow such further time for making the claim as may appear to be reasonable under the circumstances.

19 E. Where any person, on applying for probate or letters of administration, has estimated the estate of the deceased to be of less value than the same has afterwards proved to be, and has in consequence paid too low a court fee thereon, the Government of Mysore may, on the value of the estate of the deceased being verified by affidavit or affirmation, cause the probate or letters of administration to be duly stamped on payment of the full court-fee, which ought to have been originally paid thereon in respect of such value and of the further penalty, if the probate or letters is or are produced within one year from the date of the grant, of five times, or if it or they is or are produced after one year from such date, of twenty times, such proper court-fee, without any deduction of the court-fee originally paid on such probate or letters :

REPORT ON SILO OPERATIONS, HUNSUR, 1885-86.

Nine silos were filled at Hunsur in 1885; a statement showing the measurements, contents, dates of filling, cost per ton and other particulars is appended. A few observations on the operations conducted may prove of use.

Silo No. 1—dimensions $32' \times 12' \times 8'$ —was filled in November 1884 as per report for that year (*Silo No. 3* of 1884); the silo was opened on the 31st October 1885 and a small quantity taken out, the smell was strong but not offensive and the silage which was moist and of good color was eaten readily by the cattle; as it is desired to test the length of time for which silage may be kept, the silo has not again been opened.

Silo No. 2—dimensions $32' \times 12' \times 8'$ —was filled in September 1885 with green cholam, not yet opened.

Silo No. 3—dimensions $32' \times 12' \times 9'$ —was filled in October 1885 with karada grass, not yet

opened. Dimensions $32' \times 12' \times 8'$ —filled in November 1885; 2' of hay and 2' of green grass on the first day, the hay being at the bottom, on the third day the temperature had risen to 124° F. when another 3' of green grass was put in, on the fourth day the temperature was 124° F. when another 3' of green grass was put in, on the sixth day the temperature was 124° F. when the silo was opened and covered.

The silage was cut in the morning and laid in small heaps until about 2 P. M., when it was put in the silo. The temperature never exceeded 124° F.

The silage was of a bright brown color, moist and the smell very much resembling grass. The silage had sunk down $2\frac{1}{2}'$ and weighed 40 lbs. per cubic foot. Issued to working cattle.

Silo No. 5—dimensions $32' \times 12' \times 7'$ —was filled in November 1885, with the same kind of grass as No. 4, freshly cut and wet with dew; 5' of green grass was put in each day, the temperature rose to 133° F. On opening, the silage had a strong and offensive smell, very moist, and of a dark-brown color, but was eaten by cattle as readily as the contents of No 4; the grass had sunk down $2\frac{1}{2}'$ and weighed 45 lbs. per cubic foot; issued to working bullocks and sick cattle.

Silo No. 6—6' diam. 9' deep, small experimental silo filled with gemjain grass, a long tough grass opened on the 28th June 1886, cattle refused to eat it. This grass is not eaten by cattle even when growing green.

Silo No. 7—6' diam. 8' deep.

Same as No. 6.

Silo No. 8—dimensions $32' \times 12' \times 8'$ —was filled in October 1885 in 2 days, no temperature or other observations taken, contents coarse jungle grasses; when opened, found good and eaten readily by cattle, grass had sunk down $3'$ below the top of silo; weight 43 lbs. per cubic foot; issued to steers and home-herd cows and calves.

Silo No. 9—dimensions $42' \times 9' \times 10'$ —same as No. 8. Grass had sunk down $2\frac{1}{2}'$; weight 45 lbs. per cubic foot, issued to steers and home-herd cows and calves.

Silo No. 10—dimensions $42' \times 9' \times 10'$ —was filled in December 1885, with coarse grass from the bed of a tank. When opened, it was found that the grass had sunk down $3'$ and weighed 43 lbs. per cubic foot, the silage had a very offensive smell, but was eaten by the cattle readily; about a foot from the bottom the silage was mouldy and rotten.

The whole of the silos were trodden down by elephant except Nos. 6 and 7 and were then covered with the excavated earth; the average weight of pressure per square foot was from 210 to 244 lbs. The cattle fed on silage improved very much in condition especially the young steers which were very low but are now equal to what they are at any time during the year; the improvement may, however, be partly attributed to a few showers of rain which fell in May and brought up the young grass in the kavals in which the cattle were grazing. When first fed on ensilage, the cattle suffered from diarrhoea which only lasted a short time, viz. 14 to 21 days.

A number of working bullocks were weighed and a statement of weights as taken on 21st April and 30th June 1886 is appended.

Four cows were obtained for experiment, two to be fed on ensilage and two on the same kind of grass made into hay; a table showing weights of cows and calves on different dates is also appended. Observations on the yield of milk show that the yield of the two cows fed on ensilage increased at the end of one month about 80 per cent and at the end of the second month to nearly 200 per cent, at the same time the cows and calves improved in condition, while the yield of milk from the cows fed on dry grass became gradually less and at the end of two months was about 30 per cent worse than at the commencement of the experiment.

The cost per ton of ensilage is Rs. 1—1—6 which will be reduced next year as a mowing machine has been received for the use of the Depot.

I append a report from the Chaudri in charge of the cattle fed on ensilage at Kodagihalli.

The warrant officer in charge also noticed the same symptoms in the case of the young steers on ensilage, but he attributed it to their previous weakly condition as the silo at other places did not produce similar effects on strong and healthy cattle and the steers were not affected a few days.

This is the first instance, I have heard of, in which the use of ensilage has produced such effects.

The description given to me verbally was that the cattle after eating the fodder appeared very dull and disinclined to move and if made to get up seemed for some little time unsteady on their legs, this however soon passed off and no bad effects followed.

SUMMARY OF THE WEATHER REPORTS FOR MARCH AND APRIL 1886.

The early portion of March was characterized by a very low barometric pressure, in the Punjab and the adjacent parts of the country, but elsewhere it was much below the average. Though pressure rose steadily during the latter half of the month, the average of the whole month showed a slight deficiency over the greater portion of India and British Burma. In the North-Western Provinces the variations were irregular, and in Bengal there was a slight excess. In April the pressure was generally very nearly the average, the variations ranging slightly below the normal in Bombay, Bengal and Central India and above it in all the other Provinces.

In March damp rain bearing winds were more frequent than usual throughout the Upper Provinces, and there was a great excess of rain-fall over the whole of Northern India. In Sind and Central India also there was a slight excess; but little or no rain fell in any part of the Peninsula and less than the average amount in Ceylon. Snow fell on the lower ranges of the North-Western Himalaya on the 7th and 8th March, and again on the 1st April. On the latter date, there was a considerable fall of temperature in North-Western India and the mean temperature at Muree was not less than 10° below the normal. After this, however, the weather cleared, and any further rain was slight and fell at long intervals. In April there was a general absence of rain. Dry north-west winds continued to blow steadily over the whole of North-Western and Central India as far east as Behar. On the Malabar Coast also, the winds were from the north-west, sometimes north; and on the Coromandal Coast from between south and south-west, except along the Madras Coast and in Lower Bengal the humidity of the air was much below the average, more especially in Central India and Behar.

In March the temperature was everywhere more or less below the average, the depression being greatest in the Punjab, Rajaputana and Sind, where it ranged between 2° and 4.5° .

In April the variations from the normal were generally small, and except in Bombay and Central India there was an excess of 1° to 3° , were everywhere within 1° of the average.

The following table shows the amount of rain and difference from the average during the months of March and April 1886 according to Districts as far as is indicated by the telegraphic reports. The first column shows the number of stations used to determine the average for the District.

SUMMARY OF THE WEATHER REPORTS FOR MAY 1886.

980

Pressure was more or less above the average during the 1st week, after which, a period of depression set in lasting for a few days, when the barometer again rose and remained slightly above the average till the 24th. In the last week, however, the pressure again fell below the normal.

On the mean of the whole month, the pressure was slightly above the average in the North-Western Provinces, Assam, Bengal and Orissa and below it elsewhere. The rain-fall returns show that rain fell in one part or another of Ceylon, Madras and Burma throughout the month. In Bombay there was no rain till the 16th, and then only a few drops at Sholapore; but on the 20th there was a rather heavy fall at Karwar and a few showers at two or three stations on the coast to the north, which were repeated till the close of the month. The winds on the Malabar Coast were generally westerly but light.

In Northern India such rain as occurred was sporadic and fell at intervals of several days, generally in local storms. The total rain-fall of the month was below the average in the Eastern Punjab, Assam, Cachar, Burma, Khandesh and Berar and there was little or no rain in Sind and Gujarat, everywhere else there was either an average quantity or an excess.

This excess was greatest in Ceylon and the Karnatic, more especially in the East Province, where the total fall was about three times the average amount. This was to a great extent due to the heavy rain accompanying the cyclonic storm, which crossed the Madras Coast from the Bay of Bengal on the morning of the 24th and passed across the Peninsula during that and the following day.

The temperature of Northern India was changeable; but, on the whole, the mean temperature of the month differed little from the average, being slightly below it in the North-Western Provinces, Bengal, Pegu and Madras and above it elsewhere. The greatest excess was about 4° in Sind. South-east winds were more frequent than usual in the Upper Provinces. On the Central Indian plateau and in the western half of the Peninsula, the winds were, on the whole, westerly, and on the coasts of the Bay of Bengal southerly. The humidity of the air was generally below the average in the Punjab and above in Southern India.

The following table shows the amount of rain and the difference from the average in the month of May 1886 according to Districts as far as is indicated by the telegraphic reports:—

SUMMARY OF THE WEATHER REPORT FOR THE MONTH OF JUNE 1886.

The first week of the month was characterized by a considerable depression of temperature in the Punjab and the adjacent parts of the North-West Provinces; but in the second week the temperature rose quickly, and from the 10th to the middle of the month it was high over the whole of North-Western and Central India; on the hills, as well as on the plains. At Murree the thermometer marked 93° and at Simla 89° on the afternoon of the 14th. In the latter half of the month the rains set in, and the temperature fell all over the country, except in Sind and the Carnatic. The fall was greatest in the Punjab, the North-Western and the Central Provinces, and least in Bengal and the peninsula.

On the mean of the whole month, the temperature was from 1° to 4° below the average, in the Upper Provinces and Rajputana, and 1° to 2° in the Central Provinces. In Assam it was from 1° to $2\frac{1}{2}^{\circ}$ above the average.

The barometer was subject to great oscillation during June, but on the general average of the month the irregularities compensated each other, or nearly so, leaving a slight excess of pressure outstanding over a large portion of Northern India, the Central Provinces, and parts of the Carnatic, and a similar slight deficiency elsewhere.

The dry westerly winds, which were blowing in the Upper Provinces, at the close of May, continued till about the 6th of June, when south-east winds advanced from the Bay of Bengal up the Gangetic plain to the Punjab, but were generally restricted to the submontane districts. On the 13th a small storm was formed off the Orissa coast, and subsequently moved forward, first to Calcutta, and then north-west and west across Western Bengal and Central India. Thence it moved rapidly to Sirsa, and finally to the north of the Punjab. The rain-fall accompanying the storm was rather heavy, and it ushered in the monsoon rains over the North-Western Provinces, Central India, and a large portion of Rajputana and the Punjab. In general, the winds were from south-east in the Gangetic plain and under the hills of the Punjab, southerly at the head of the Bay of Bengal, and westerly elsewhere.

On the western coast of the peninsula the monsoon current was weak during the first two weeks and the rain-fall was restricted to the more southern provinces. The rain-fall of Malabar was rather below the average, but in the Konkan (except at Goa) there was an excess. In Cutch and Sind there was little or no rain. In the North-Western Punjab, on the Himalayas, in Behar, Northern Bengal, Assam and Burma, the rain-fall was more or less below the average, while on the plains of the Central and Eastern Punjab, the North-Western Provinces, Rajputana and Central India, there was more rain than usual. At the majority of the stations in Lower Bengal, Orissa, Madras and Ceylon, the total rain-fall of the month exceeded the average, but in the Central Provinces it was below it.

The following table shows the amount of rain and the difference from the average during the month of June 1886, according to Districts, as far as is indicated by the telegraphic reports:-

SUMMARY OF THE WEATHER REPORTS FOR JULY 1886.

A depression of temperature throughout North-West India, though not so marked as in June, was still appreciable. The mean temperature of the month was from 1° to 4° below the average, over a large portion of the Upper Provinces, in Rajaputana, and Behar, as well as in the Carnatic. Elsewhere the differences were in general small. Only in Sind, parts of the Central Provinces, and Burma, was the temperature slightly higher than usual.

As a general rule, the mean pressure of the month was very slightly in excess of the average in Northern India, and below it in the peninsula and Ceylon; most so in the Southern Deccan, Mysore and Malabar. In the Gangetic plain, and the greater portion of the Punjab, east or south-east winds were most frequent.

The atmosphere was much damper than usual over nearly the whole of Northern and Central India and in the Carnatic and more or less so in other parts of the country, excepting the west coast and Western Deccan, Lower Bengal, Orissa, the Eastern Districts of the Central Provinces, and Burma.

The rain-fall was generally heavier and better distributed than in the previous month. In the first week there was fairly general, and, in some cases, heavy rain in the Upper Gangetic plain, on the Central India plateau to the south of the river, and in the western half of the peninsula. On the 10th heavy rain fell at several stations on the Malabar coast, and continued, with short intervals of light rain-fall, up to the 25th of the month. In Northern and Central India, after the 7th, the rain-fall was either light or ceased altogether, until a small storm from the Bay of Bengal again brought rather heavy rain to the Central Provinces, Central India, and the southern parts of the North-Western Provinces. This storm, was generated in the north-west corner of the Bay, about the 17th, and on the 18th it moved forward—first on a northerly course, and then almost due west. On the forenoon of the 23rd, the centre reached the neighbourhood of Neemuch, and within the next twenty-four hours, broke up over the desert to the west of the Arvalis.

Except at Peshawar and Rawalpindi, the rain-fall was more or less above the average throughout the Punjab. In Oudh, and indeed in most parts of the North-Western Provinces east of the Ganges, it was below the normal amount; but to the south of the Ganges, there was more rain than usual. In Northern Bengal, and also in Burma, the rain-fall was short; but everywhere else, with only local exceptions, the average was exceeded. In Sind, and the Carnatic the total amount was about double the average. In the Konkan, also and Guzerat there was a considerable excess.

The following table shows the amount of rain and the difference from the average during the month of July 1886, according to Districts as far as is indicated by the telegraphic reports:—

ADDRESS

OF THE

DEWAN OF MYSORE

TO THE REPRESENTATIVE ASSEMBLY AT MYSORE,

on Saturday, the 9th October 1886.

GENTLEMEN:—I have much pleasure in laying before you today, by command of His Highness the Maharaja, a statement showing the principal features of the administration of the Province during the past official year; and in doing so, it is particularly gratifying to me to be able to premise that this is the first year since the Rendition of the Province, in which the prospects of the season have occasioned no anxiety to His Highness' Government. At every previous meeting of this Assembly reference had to be made to a failure of the rains, more or less general, and in my address to you last year, I dwelt at considerable length on the scanty rain-fall of two successive years, and the consequent apprehensions of widespread scarcity and distress,—apprehensions which at the time of our last meeting were beginning to be dispelled by the advent of a favorable north-east monsoon. In October and the following months copious and seasonable rain fell, which allowed of fair crops being raised in every part of the Province, and the year on the whole proved to be one of average agricultural prosperity. Again during the current year the season has so far been exceptionally good; the rain-fall up to the end of the last month in the dry Districts on the north and north-east is fully twice the quantity gauged during the corresponding months of the last year; almost all our important tanks are already full or nearly full; and altogether the year promises to be one of the most prosperous we have had for a long time past.

I now proceed to read to you the usual statements, showing the income and expenditure under all heads except the Railway, which I reserve for separate treatment.

It will thus be seen that the ordinary revenue of the State was Rs. 1,14,30,754, against Rs. 1,00,70,957 in 1884—85, and the expenditure Rs. 1,01,16,957 against Rs. 99,55,601.

In the statement of income the most striking feature is the large increase of 9½ lakhs under Land Revenue. It includes a sum of 3½ lakhs which was collected out of the deferred demand of 1884—85; during which year, owing to the bad season, considerable remissions and postponements of revenue to the aggregate extent of 5½ lakhs were found necessary. If the deferred collections of 1884—85 (viz. about 3½ lakhs) be deducted from the land revenue receipts of 1885—86, the income pertaining to the latter year is reduced to about 73 lakhs, which, you may remember, was the maximum amount of annual land revenue ever realized in Mysore.

The history of this important item of our revenue during the past half-century shows continued improvement during the first four decades, when the averages were 50½, 53, 67½, and 72½ lakhs, respectively. Then there was a great fall due to the disastrous famine of 1876—78; but during the past five years, there has been going on a steady process of recovery.

The pre-famine figure of 73 lakhs was reached in 1883—84 and again in 1885—86, and the demand for the intervening year 1884—85 was also about 73 lakhs, though, owing to the exceptional circumstance already adverted to, a much smaller amount was actually realized before the close of that year. Thus our land revenue may now be said to have recovered from the effects of the famine of 1876—78, and we may fairly assume that the extent of land now under cultivation is about the same as before that famine.

The improvement under "Forests" was mainly due to the revival of the market for sandalwood from the depression of the previous year, and to a smaller extent to an increased supply of Railway sleepers.

All other items of revenue participate in the general improvement due to a prosperous season.

The total expenditure in 1885—86 was Rs. 1,01,16,957 and exceeded that of the previous year by Rs. 1,61,356. The increase under Public Works alone was Rs. 2,38,612, the usual annual grant of 9½ lakhs having had to be raised to 12 lakhs for the improvement of Irrigation Works under circumstances which I explained to you last year.

Deducting expenditure from income, the surplus of the year amounted to Rs. 13,13,797 which however included the realizations on account of the previous year's arrears under all heads to the extent of about 4½ lakhs.

The budget estimates of receipts and disbursements for the current year are based mainly upon the actuals of the two previous years.

A total estimated expenditure of Rs. 1,10,53,000 is provided against an actual of Rs. 1,01,17,000 in 1885—86. The large increase of Rs. 9,41,000 is accounted for as follows:—

Provision has been made for the addition of Rs. 3,00,000 to His Highness the Maharaja's Civil List in accordance with the arrangement made at the time of the Rendition. The reconstitution of abolished Districts and Taluks accounts for an increase of about $\frac{3}{4}$ lakh in Revenue Establishments, while the Office of Inspector General of Police, Police Assistants for the two new Districts and the reconstitution of the Sub-Judge's Court at Mysore involve an additional expenditure of about Rs. 36,000. The large increase of Rs. 1,86,000 in the remuneration of village servants is due to the fact that the payments to these servants which had been held in abeyance in some of the recently settled taluks have to be paid in full, until alteration of the present system. An increased expenditure of Rs. 1,16,000 under 'Forests' is anticipated, owing to proposed extension both of felling and planting operations. Entries under "Mint" appear on both sides of the account, and are nominal transactions referring to the supply of copper and small silver coins. The Public Works Department grant being fixed at 12 lakhs as in the previous year accounts for an excess of Rs. 68,000 over that year's actual expenditure of Rs. 11,32,000. A grant-in-aid of Rs. 60,000 has been given for sanitary improvements in the city of Mysore.

The foregoing are the principal heads under which the budget for the current year provides for an increased expenditure. These increases amount in the aggregate to over 9 lakhs of rupees. But I may here add that the budget provides for a maximum expenditure according to sanctioned scale, and that savings anticipated are likely to reduce the budget provision by about 1½ lakhs.

Railway.—On the State Railway during the past year, the capital expenditure incurred amounted to Rs. 4,16,833 and was almost exclusively on the Tumkur-Gubbi section. The gross earnings of the entire system of 140 miles amounted to Rs. 4,43,021, and deducting the maintenance charges of Rs. 2,27,048 left a surplus of Rs. 2,15,973. This net income represented a return of 3.31 per cent on the capital outlay of Rs. 65,18,777 up to 31st March 1886.

Last year I explained to you at some length the nature of the negotiations then in progress for the transfer of the Railway on hypothecation to the Southern Mahratta Company. Since then, the contract with that Company has been concluded by the Secretary of State acting on behalf of Mysore, and in accordance with that contract, a loan of £ 1,200,000 has been raised by the Company and the proceeds paid to the credit of the Secretary of State. The loan, owing to the condition of the money market of the day, had to be raised at an interest of 4 per cent. The rate of guaranteed interest payable by Mysore to the Company will therefore be 4 per cent instead of 3½ per cent I mentioned last year. Also this higher rate of interest has to be paid upon a much larger capital than what I specified on that occasion; and in consequence of this, the financial forecast I then made has now to be considerably modified. In other respects the arrangement concluded appears to be identical with what I described at the last Annual Meeting, but as a copy of the contract and the further instructions of the Government of India on the subject have not yet been received, I am at present unable to give you fuller information or to say what definite financial arrangements are required for meeting the large annual liability for guaranteed interest, or for the repayment of the loan at the end of 50 years, when, by the terms of the contract, it seems to be repayable.

Under instructions from the Government of India the actual transfer of the management of the Railway to the Southern Mahratta Company was effected on 1st July 1886. Thus the interests of this wealthy and powerful Company in the development of the open line and the early construction of the extension have become identical with ours. The Company's staff will ere long take the field, and actual construction once begun, I have not the slightest doubt that the work will be pushed forward with all possible speed.

A proposal to have a more direct and shorter line than that followed by the Mysore Engineers from Gubbi to Harihar was at one time under discussion. You will be glad to hear that His Highness' Government still adhere to their original opinion that the route most suitable for the trade requirements of this Province is decidedly the more westerly, though somewhat circuitous, one *via* Tiptur, Arsikere, Kadur and Birur; and there is little probability of this route being changed.

In view of the possible extension in the future of our Railway system in the direction of Bellary, a line from Bangalore to Hindupur has been surveyed and is now being marked out.

I give below a statement showing the entire cost of the State Railway (in construction and surveys) from the commencement up to the date of its transfer to the Southern Mahratta Company:—

Financial Retrospect.—As five years have now elapsed since the Rendition of the Province, a brief survey of the progress of our finances during that period will probably be of some interest to you. I therefore proceed to place before you a short statement showing the result of the transactions under all heads of revenue and expenditure, during the five years from 1st April 1881 to 31st March 1886.

Cr.	Rs.	Dr.	Rs.
Opening Revenue cash balance on 31st March 1881	24,07,438	Expenditure under all heads except Railway	5,21,52,468
Revenue receipts under all heads for 5 years from 1st April 1881 to 31st March 1886	5,52,08,280	Expenditure on Railway Capital	41,97,295
Railway Loan	20,00,000	Total Expenditure	5,68,49,763
Total	5,96,15,718	Closing Revenue cash balance on 31st March 1886	32,65,955
		Total	5,96,15,718

It will be seen from this statement that the Maharaja's Government started with a cash balance of Rs. 24,07,438, and that by the addition of the surplus of the next five years, it now amounts to Rs. 32,65,955, that is to say, an increase of Rs. 8,58,517 has been secured. In addition to this we have been able to invest in the construction of the Mysore-Gubbi Railway the large sum of Rs. 41,97,295; twenty lakhs being obtained by the Railway Loan of 1882, and the remainder (Rs. 21,97,295) being provided out of current ordinary revenue. Thus the total of five years' savings and investments amounts to about 30½ lakhs. This result, satisfactory as far as it goes, has not however been achieved without to some extent starving ordinary Public Works, such as tanks, channels and roads, and without resorting to the most stringent measures of retrenchment in all Departments, and in the case of some Departments, even beyond the limit of complete efficiency.

This policy was pursued, as you are aware, not with a view to accumulate an idle surplus in the Treasury, but for the express purpose of providing funds for the construction of the Railway. The importance of this work for purposes of famine protection was brought to prominent notice by the disastrous events of 1876-78, and it was commenced by the British Government who, before the Rendition, spent over 23 lakhs upon it. Immediately after the Rendition the Durbar resolved to complete it up to Tiptur at as early a date as possible, and to obtain the funds required for this purpose by a large reduction of the cash balance, by a loan of 20 lakhs and by retrenchments in all Departments. The measures thus adopted were eminently successful; for we have been able to complete the Railway as far as Gubbi (140 miles) and (but for the instructions of the Government of India in connection with the proposed negotiations with the Southern Mahratta Railway Company) we could also have carried it to Tiptur, a further distance of 32 miles. But as I explained to you on previous occasions, the extension of our system so as to connect it with that of the Southern Mahratta Company with its outlet on the Western Coast, is a work which cannot be done out of the ordinary revenue within a time which can be regarded as reasonable, or without involving a considerable neglect of the claims of numerous minor works of vital importance. From this point of view the surrender of the Railway to foreign capitalists is a measure of distinct advantage to the State. It provides within a brief period a complete Railway system which we so much need, and at the same time it leaves us free to devote our ordinary revenue resources to their more legitimate purposes.

Irrigation.—First and foremost among these stand "Irrigation Works," upon which the well-being of Mysore so much depends. The annual expenditure upon these works since the Rendition is given below;—

	Rs.
1881—82	3,28,368
1882—83	2,85,297
1883—84	3,54,189
1884—85	3,41,520
1885—86	4,54,145
1886—87	6,85,800 (estimate)

Public Works Department Policy.—You will see from these figures that the prospect of the transfer of the Railway to foreign capitalists enabled us in 1885—86 to devote to irrigation a larger sum than theretofore, and during the present year, with the completion of the Railway transfer, we propose to spend the large sum of 6½ lakhs on restoring, improving and extending irrigation works of all kinds. As our financial prosperity so much depends upon the vicissitudes of the seasons, and as years of depression alternate with periods of plenty, it is of course impossible to forecast with exactitude the extent to which the resources of the State can be annually devoted to the development and improvement of irrigation works; but I can assure you that no effort shall be wanting on our part to assign for this purpose the largest allotments compatible with other demands on our finances. This may be accepted as the cardinal feature of our Public Works Department policy; for we are conscious that a vast deal remains to be done in the way of general improvements to our truly magnificent system of tanks, of the reconstruction of ruined abandoned tanks likely to be remunerative, of the restoration and, where practicable, the extension of channels drawn from the Cauvery and other rivers, of the construction of the great Marikanave Reservoir and smaller new works where required. The magnitude of these works in the aggregate is so great that we accept it as a settled principle that our annual operations on them ought to be limited only by the extent of the resources at our disposal for the time being.

Special Irrigation Projects.—The liberal provision for Irrigation Works made in the current year's budget has led to several important works being undertaken. Among these, I may make special mention of—

- (i) the Rampur Channel development and extension, from which considerable benefit, I am confident, will accrue. The project for this is now before me;
- (ii) an extension of the Virjanadi Channel, the feasibility of which is at present under investigation; and

985²

- (iii) a similar extension of the Maddur Ané Channel; and improvements to the Ramasamudram and Rajaparameswari Channels, which are now under execution.

That the more important of our old tanks are not being neglected, a glance at the items of the Budget will show, upwards of 150 restorations or improvements of large tanks being provided for, apart from numerous smaller tanks.

In my address last year, I described to you the proposal for the tentative introduction into a few selected taluks of a scheme for enlisting the co-operation of the ryots in the matter of the maintenance of the smaller irrigation tanks scattered over the country. It was then in contemplation to apply the scheme to tanks with a revenue of less than Rs. 500, but after consultation with experienced officers and in the interests of the ryots themselves, it was decided to reduce the 500 rupee limit to one of 300. With this modification, the scheme has been introduced into eight selected taluks, one in each District, and is reported to be in operation. The experiment is being closely watched by the Government, and I am glad to find that the local Revenue officers concerned are directing their best energies to ensure its success.

Referring to the Marikanave Reservoir, I said last year that the project was being examined by the Government. On mature consideration of the general prospects of the country and the financial bearings of this great work, it has been deemed prudent to defer further action for the present owing to the superior claims of smaller works more likely to produce immediate increased prosperity. To defer indefinitely a work of such importance is not in our mind; for it must be acknowledged that its cost, great though it be, sinks into insignificance when weighed against what Government holds to be the imperative duty of famine protection in the arid tracts of Chitaldroog. It is true that recent professional opinion tends to show that the difficulties and risks of the work proposed are greater than had previously been apprehended by our Engineers. The cost of getting in the foundation alone across the river has been roughly estimated at 3 lakhs of rupees, and there is apparently the danger of even entire waste of that large amount, should the rock prove treacherous or unsound in any part. Nevertheless the work will not be lost sight of when funds sufficient are forthcoming to justify a reasonable expenditure in the attempt to secure a perfectly reliable foundation on which to commence the building of the great dam.

During the next few years of Railway extension, the demand on account of guaranteed interest will not allow of our undertaking so costly a work. Moreover there are, as already stated, several comparatively smaller works which have a prior claim upon us as they are likely to lead to a large immediate extension of cultivation in parts of the country much more thickly populated than the dry taluks of Chitaldroog. These considerations have led to the formation of a new Public Works Department Division called the "Channel Division" to deal with the restoration and extension of channels drawn from the Cauvery, Hemavati, Kapini and Lakshmanatirtha. These important works are, as I before pointed out, being pushed on with vigour and may absorb the whole of our available resources for the next 3 or 4 years.

Other Public Works.—Before taking leave of this subject of special public works, I think it well to say that the wants of the Province in regard to roads and bridges are not being forgotten, and that irrigation works, though of first importance, are not being attended to, to the exclusion of our means of internal communication. These will always receive their due share of attention and of money, and I may mention that this year, whilst we have several minor roads and railway feeders in hand, we have also under execution two important bridges, that over the Hebbhalla between Maddur and Malvalli, and that over the Sulikere river between Harihar and Malebennur. A project for a bridge of the first importance—that across the Yagachi river close to Belur, the pressing necessity for which was prominently brought to His Highness' notice during his tour last year—is now before me, and I hope soon to be in a position to accord sanction to the estimate.

Before concluding this section of my address, I may state for your information that the average amount of provincial revenue devoted annually to public works during the past five years is Rs. 9,90,374, as compared with Rs. 16,23,290 in the five years immediately preceding the late famine. During the current year, as already stated, it is proposed to spend 12 lakhs.

Gold Mining.—The recent revival of the Gold Mining industry under the influence of the favorable results obtained by the Mysore Gold Mining Company in Kolar promises to have an important bearing on the prosperity of the country. Mining operations are being already prosecuted with renewed vigour by several companies in the neighbourhood of the Mysore Company's mines, while elsewhere, other companies are preparing to begin or resume work. In the Kolar field especially the works undertaken are on an important scale. Shafts of great depth have been sunk through the most promising reefs, costly machinery has been erected for extracting and crushing the ore, and substantial buildings have sprung up all round for the housing of those engaged on the mines.

It is now beyond doubt that gold bearing strata have been reached and gold in considerable quantities is being brought to the surface day by day. Already have Rs. 38,368 been paid into His Highness' Treasury by one Company alone (namely, the Mysore Company) as royalty for the gold extracted. But in forecasting the future of this industry, it is needless to say that it behoves us to speak with great caution, for, in Gold Mining everywhere, there is always an element of speculation and uncertainty. But there can be no harm in my referring to a fact, of which you are so well aware, that history and tradition alike point to Mysore as a country which, in the past, produced large quantities of gold, and that there are to be seen in the present day the remains of extensive ancient workings scattered all over the country. If the experience gained in the Kolar field can be accepted as a guide, there is little reason to doubt that the extraction of the precious metal in remunerative quantities in various parts of the Province awaits only the application of modern appliances on a suitable scale. His Highness' Government are therefore prepared to afford to the enterprise—as indeed they have always afforded—every facility compatible with the rights of the people and the claims of the State. It has always been our object to attract *bona-fide* working companies to the enterprise. In granting 30 year leases of one square mile blocks instead of 20 year leases of smaller blocks as elsewhere, we have aimed at offering adequate inducement to the employment of large capital. In levying a royalty on actual yield instead of a heavy acreage assessment so prohibitive in the early stage of mining operations, we have sought to protect the permanent interests of Government without hampering the development of the mines. Our policy, though conceived on such essentially liberal lines, has not, it must be admitted, as yet attracted to the enterprise sound working companies to the full extent we anticipated, in parts of the Province beyond the Kolar field. Such companies most naturally object to pay a large price for a thing of unknown value, and their attitude of caution is justified by the experience of their predecessors who suffered from the material reduction of their working capital by the heavy prices paid to intermediate concessionaires. To what extent our present system must be modified so as to place our auriferous lands within the direct reach of sound working companies is thus a question which calls for an early solution. As at present advised, His Highness' Government are of opinion that the present stage of the mining enterprise in the Province would justify their seeking to solve this question somewhat on the following lines:—

- 1st. To leave the whole country open for the operations of prospecting parties free of charge.
- 2ndly. To guarantee to each prospector the mining rights over a fixed quantity of land, provided that he conforms to prescribed conditions of diligent prospecting, by means of suitable boring and other operations.
- 3rdly. To require that the selection, by him be made within a prescribed reasonable time, his claim being restricted to the locality over which he has actually prospected.
- 4thly. To provide that before the Government actually make the grant, the necessary working capital shall be forthcoming; and that in default, such prospector's mining rights shall be forfeited.
- 5thly. To fix the extent of land for each grant so as to bear a previously prescribed proportion to the actual amount of working capital forthcoming; and
- 6thly. To stipulate for the due commencement and prosecution of work on a scale commensurate with the extent of the grant, and for a moderate royalty, regulated at first according to the proportion of gold extracted to quartz crushed, but never exceeding a fixed maximum rate on the actual out-turn of gold.

Such a system will, it is believed, reduce to a minimum all elements of risk and uncertainty for the investor. The comparatively small outlay required for efficient prospecting operations is not likely to deter the intending investor as he will be able to start such operations with a distinct Government guarantee for the grant of a fixed area, when the results of prospecting induce him to demand such a grant. By adopting such a system, His Highness' Government hope to be able to place the whole of our auriferous lands within the direct reach of English capital, and thus to ensure the extension and permanence of the enterprise in Mysore.

With a view to add to the knowledge of the public concerning our mineral resources and the history of Gold Mining under ancient dynasties, a small prospecting party has been organized for the purpose of locating on the sheets of the Topographical Survey the principal runs of gold-bearing strata as indicated by the remains of ancient workings; and for drawing up a general report on the subject after a careful examination of the whole Province. This work is expected to be completed within the next few months, after which the State will be in a position to arrange for the verification by a Government geologist of the results reported by the prospecting party and to place the whole of the information thus secured at the disposal of the public. Such information cannot of course enable one to judge whether gold in paying quantities exists in any particular locality, but an exact knowledge as to the situation and extent of the main runs and of the old workings, will doubtless be of great help to intending prospectors.

It may also be desirable to establish an arrangement under which an intending prospector may find within easy reach the means for making small borings with diamond drills or other appliances. But this is of course a matter in which the Government will not be called upon to take action until a demand for such facilities springs up.

To sum up—the object which the Government have in view is, while affording the amplest facilities for prospecting operations, to restrict grants to such *bona fide* companies as are capable of working them, promoting thereby the influx of capital for the development of a most promising industry and placing it on a practical basis beyond the sphere of speculation.

Education.—The subject of education is one which the Government regard as of the foremost importance. Their policy may be briefly summed up as aiming at the following ends: to maintain unimpaired and in thorough efficiency all the means of elementary and secondary education, and to bring them within the reach of all classes both by direct agency and by assisting private effort; to promote a scholarly study of the local vernacular and of our ancient classical languages; to elevate and extend female education and to conduct it on a system strictly national so as to enlist popular sympathy in its progress; to encourage higher education and train young men for the professions of medicine, engineering, &c.

Of the means adopted by His Highness' Government for the attainment of the various objects in view, the following are some of the principal. A Mysore local examination has been instituted which will lend more importance to vernacular study; tests demanding high attainments in all branches of Sanscrit learning have been established in connection with the Sanscrit College at Mysore; aid on a large scale has been given to the Maharani's Girls' School which, from the soundness of its system, is attracting general attention as a model and a guide; the teaching staff of the English Colleges and High Schools has been strengthened with several men of special talent, while the pay and promotion of the masters generally have been placed on a footing calculated to encourage exertion and permanently to retain for the Department the services of an efficient staff; and liberal scholarships have been given to selected students of proved ability to go through a professional course in the large and fully equipped Medical, Engineering, Agricultural and Forest Colleges of British India.

Archæology.—Systematic archæological research began in Mysore in the beginning of the last year. The arrangements made provide for a complete examination throughout the Province of ancient inscriptions which are very numerous, and which, to judge from what have already been deciphered, promise to yield important results.

Regular archæological surveys have already been established in the neighbouring Bombay and Madras Presidencies, but it is believed that in Mysore, by its occupying an intermediate position, will often be found the key or connecting link to much that is being there discovered.

We have entrusted this important work to Mr. L. Rice, C. I. E., who by his high scholarly attainments and varied researches in Indian antiquities is specially qualified to do full justice to it. Up to the present time he has surveyed 18 taluks more or less completely, and collected upwards of 1,500 inscriptions. The results of what have been found will, from time to time, be issued from the Press where special arrangements have been made for the purpose. The Government feel confident that the researches now in progress will be the means of throwing much new and valuable light upon the interesting ancient history of Mysore.

Legislation.—In the Legislative Department, there is but little new work to report. Regulation I of 1886 (the Criminal Procedure Code Regulation) was passed into law in April last. In connection with this Regulation, the Government of India have been pleased to empower Police officers and Magistrates in this Province to exercise with respect to European British subjects, the same powers as are exercised by Police officers and by Magistrates other than Justices of the Peace, in British India beyond the limits of the Presidency Towns.

The Draft Revenue Code to which I referred last year, has been finally revised and submitted recently to the Resident. A Draft of the required subsidiary rules under this Regulation has also been prepared and is under consideration.

The Local Boards Regulation which was submitted to the Government of India by the late Officiating Resident, Mr. C. E. R. Girdlestone, with an exhaustive Minute, has been received back, and is now under discussion.

Another Draft Regulation relating to Hackney Carriages in the Bangalore Town has been submitted for the approval of the Government of India.

A Draft of the "Mysore Law Amendment Regulation" has been prepared and is under discussion. It deals with all British enactments introduced into Mysore from time to time before the Rendition and provides for the verbal modifications required to adapt them to the altered circumstances of the Province after Rendition.

Drafts of Regulations on the subjects of Companies, Prisons, Prisoners' Testimony, Administration of Municipalities, and Administration of Forests are also under consideration.

Anche or Local Post.—At the last Annual Meeting, I took occasion to bring to your notice two alternative proposals made by the Director General of the Post Office of India relative to the local Anche Department. One proposal was that the complete control of Postal arrangements in Mysore should be surrendered by the Durbar to the Imperial Postal Department, and that Mysore be treated in all postal matters exactly as if it were a British Province. The other alternative proposal was that Mysore should adopt all British Rules and Rates of postage and use British postage stamps overprinted "Mysore", that the Money Order, Insurance, Value payable parcel and other systems obtaining in British India, be introduced by Mysore, and that all paid inland correspondence, official or non-official, transferred from Mysore to British Post Offices or *vice versa* be delivered free. You were unanimously of opinion that the Department should be retained by the Durbar and worked, if necessary, at a loss. The Government of His Highness thereupon informed the British Resident that it considered it inexpedient to transfer the local Post to the Imperial system, but that it was ready to accept the other alternative proposal and to introduce into Mysore all the Rules of the Imperial Postal system and ensure complete reciprocity between the two Departments. To this communication a reply has been received to the effect that the alternative proposal in question has led to some practical inconvenience in the States to which it has been applied, and that until further experience of the system has been obtained, it will not be introduced elsewhere. The question therefore has had to be dropped for the present.

Before concluding this address, I may remind you that during the last year His Highness the Maharaja made his first tour through the Province since his assumption of the Government.

The route lay for the most part through the interesting Western Districts of Mysore, where the conditions of climate and agriculture, the customs and manners of the people, are so different from those of other parts of the Province. His Highness feels that the opportunities afforded by a lengthened and leisurely progress through his dominions for seeing the people in their homes and surroundings, have added largely to his experience and to his knowledge of the country.

It is His Highness' command that I should take advantage of this meeting of the representatives of the people from all parts of the Province, to acknowledge how deeply he was impressed with the attachment and devotion manifested by all classes of his subjects. And it is his special desire that I should assure you that with the help of the insight into your wants and aspirations which a personal observation during the time passed in your midst has given him, he will devote his best energies to the promotion of measures calculated to advance your welfare.

K. SHESHADRI IYER,
Dewan of Mysore.

L. RICKETTS,
Inspector General of Forests
in charge of Govt. Gardens.

No. 5226A., dated 14th August 1886.

From—The Director, Department of Agriculture, and Commerce, North-Western Provinces and Oudh,

To—The Secretary to the Government of the North-Western Provinces and Oudh.

In reply to your No. ²⁰⁸⁷/₁₃₉₆, dated 11th December 1885, I have the honor to state that in 1883-84 Juar was ensilaged in three earthen pits and Sorghum in two masonry pits; the latter were disused masonry tanks made in connection with certain experiments connected with subsoil drainage, and were not made purposely for ensilage. Of the earthen pits, the details of cost of only one were separately noted. The pit consisted of a circular hole dug into the ground 6 feet deep and 10 feet in diameter, was plastered inside with mud and was protected by a tiling against the rains. The fodder ensilaged was Juar; its stalks were chopped before packing. The stuff was trodden down by men to pack it close, and was weighted by earth; 163 maunds of Juar were packed, when opened about 6 inches at the sides and the top had become mouldy, and this caused a loss of nearly 20 per cent.

	Rs.	As.	P.
Cost of digging the pit amounted to	0	12	6
Cost of plastering do do	0	11	3
Cost of tiling with supports amounted to	12	8	0
Total	13	15	9

Assuming the tiling and the pit to last for 10 years, the cost of construction may be taken at Rs. 1—6—6. Adding to this the price of the fodder and the cost of chaffing and packing, and making allowance for the quantity which had become mouldy, the cost per maund of good fodder taken out of the silo may be put at Rs. 0—2—6.

	Rs.	As.	P.
Price of 163 maunds of Juar stalks	16	5	0
Cost of chaffing	1	4	6
Cost of packing and weighting	1	13	3
Cost of construction of silo	1	6	6
Total cost	20	13	3

Weight of good fodder taken out 130 maunds.
Cost per maund of good chopped fodder 0 2 6.

The silo was opened in April when dry Juar stalks were selling at nearly 4 annas per maund, and the grass and bhusa were selling at Rs. 0—5—10 and 0—6—5 per maund respectively.

In 1884—85 ten earthen pits were made; of these seven were provided with chappars, and over three only a sloping mound of earth was raised, none of them was plastered. The dimensions, cost of construction and packing, and the quantity of fodder packed in each of these are noted in the following table. The price of the Juar at the time it was ensilaged was Rs. 0—1—6 per maund, and the common grass was purchased at one anna per maund :—

The average amount of wastage due to the portions by the sides becoming mouldy and the loss in weight by evaporation of some of the water which the green stalks contained amounted to about 16 per cent. Reducing the total weight by this amount and assuming the shed and pit to last for five years, the cost per maund of good Juar fodder amounted to about Rs. 0—2—6 per maund as detailed below :—

Cost of construction of silos Nos. 1 to 9	29	2	2

L. RICKETS,

Inspector, General of Forests
in charge of Govt. Gardens.

No. 5623A, dated Allahabad, 1st September 1886.

From—The Director, Department of Agriculture and Commerce, North-Western Provinces and Oudh,

To—The Secretary to the Government of the North-Western Provinces and Oudh.

In continuation of correspondence ending with this office No. 689, dated 31st May 1886, I have the honor to submit the further report on ensilage called for in G. O. No. 13597 dated 18th July 1885.

2. The following gentlemen, correspondents of the Department, were invited to co-operate:

Honorary Assistant Director Pandit Ajudhia Parshad:

Kuar Lutf Ali Khan

Mohammed Ali Khan } Raises of Aligarh.

Also the Deputy Commissioners of Sitapur, Lalitpur, and Jhansi.

Orders were at the same time issued to the Superintendents of the Government Agricultural Stations at Cawnpore and Meerut.

3. None of the native gentlemen above named appear to have had any success. On Pandit Ajudhia Parshad's estate no site could be found where the water level was not too high for sinking pits. In the case of the Aligarh Raises no explanation has been given, though repeatedly asked for. Other results were as follows:—

Sitapur, 3 pits.

22nd September	Grass	70 Mds.	11 Mds.
16th October	Juar (chari)	85 Mds.	5 Mds.
20th October	Juar (after seeding)	54 Mds.	7 Mds.

The pits were all opened in May; and although wastage was somewhat excessive in pits 1 and 3, the fodder, it is stated, was well preserved and free from offensive odour. Cattle ate the fodder, but

the Deputy Commissioner remarks that they appeared to do so with reluctance, and he expresses himself as not yet satisfied that cattle will take to the food.

These pits were opened somewhat too early, viz., on the 25th January, in the presence of the District Board. The grass was found discolored and offensive in smell, but the cattle ate it apparently with readiness.

The rains ended in this district very early, and by the time certain references from the Deputy Commissioner had been replied to, the opportunity had passed.

The first silo was opened on 1st March 1886, and of the whole quantity it is reported that 45 maunds were eaten by both cattle and horses, and 5 maunds more by cattle alone, while the balance was rejected.

The second silo was opened on 14th May. It had been protected by heaped-up earth only, whereas the first silo was protected by a light *chupper*. The winter rain had damaged the contents; consequently the out-turn of good silage was very poor.

Part of the fodder was distributed to nine zemindars and cultivators. It is stated that cows fed on it gave a noticeable increase of milk.

The juar silage appears to have been most successful: six cultivators received trial quantities, and are reported to have approved of it.

Cawnpore Agricultural Station.

Ensilage was as usual tried on an extensive scale, and full reports have already appeared in the farm kharif report. The fodders experimented with were guinea grass, juar chari (before seeding), juar stalks (after seeding), and the wild grasses of the rains.

In this report it is only necessary to refer to the latter.

Two pits were taken. The first was filled on the 16th August with 59 $\frac{1}{2}$ maunds of the first cut of grass in fine weather; and the second on the 16th September was filled in rainy weather with 60 $\frac{1}{2}$ maunds of grass.

Both silos were protected by roofing, and were opened on the 16th April in the presence of the members of the North-Western Provinces Agricultural Association. The contents were found well preserved, and were duly fed off to the farm cattle. No better opportunity could have been afforded of publicly demonstrating the value of the system than occurred on that occasion.

As to juar chari for ensilage, the term experiment is no longer applicable. It is clearly established that, either cut before seeding or cut after seeding, the stalks of juar, if chaffed, can be ensilaged with very great advantage.

In regard to grass, the difficulties are greater. Unless chaffing be resorted to, the packing of a grass silo requires skilful supervision to ensure anything like a high average of good silage when the pits are opened, or to ensure a minimum of offensive odour. It will be seen that it was only at the Cawnpore Station that thoroughly satisfactory results were obtained with grass; but even then the opinion may be offered that, so long as juar stalks can be procured, it will pay better to spend such money as may be available on ensilaging them rather than on grass.

The item of cost may be examined. From the figures given, it was as follows on the quantity realized:—

	1	2	3	4
	Construction of pits.	Purchasing or cutting grass and filling.	Maunds of ensilage per rupee on (2).	Maunds of ensilage per rupee on (1) & (2), assuming the pit and the shed to last for 5 years.
	Rs. As. P.	Rs. A. P.	Mds.	Mds.
Sitapur	Particulars not given			
Lalitpur	4 0 0	17 0 0	10	9½
Meerut	5 9 0	12 0 0	7	6½
Cawnpore	16 5 0	10 6 0	10	8

The above is a rough calculation.

The cost under (1) would recur about every fifth year. No estimate can be framed of the value of the ensilage at the time of opening the pits, as that of course would depend on a varying market. The greatest value in ensilage, in the opinion of the Home Ensilage Commission, lies in its capacity for storage against times of scarcity.

In conclusion, I venture to remark that of all facts so far established regarding ensilage, one of the most important is that the best time for cutting the fodder is just before it enters the stage of maturity; and therefore that, even with the wild grasses of the rains, it would be better to confine operations to one cutting just before the grasses ripen instead of taking successive cuttings.

Summary of the Weather Report for the month of August 1886.

Except in the Central Provinces and Assam, the mean temperature of the month was everywhere below the average, but the differences were, in general, very small; and only in the peninsula, and locally, at a few places elsewhere, did they exceed 1°. The greatest depression was in the Carnatic, where it amounted to between 1½° and 3°. The pressure was more or less below the normal average, over the whole of North-West India, during the first and last weeks of August, and above it during the rest of the month. On the mean of the whole month, the pressure was as nearly the average as possi-

... was somewhat damper than is usual at this season of the year, as in Madras, though not so much so as in the previous month. In the country, the weather was a little drier. During the first few days of the month, and in some cases heavy rain-fall in Bengal, Assam, the North-Western Provinces, and on three or four days also in the submontane districts of the Punjab, the south of the peninsula, and around the Bay of Bengal. The falls were particularly heavy in the Gangetic plain and in Sikim and Kumaon. After the 5th, however, the rain-fall, as a rule, became very light and partial, and there was a long spell of dry weather in the whole of North-West and Central India, as well as in Bengal, interrupted only by a few sporadic showers chiefly in Bengal and Assam. In the peninsula also, the rain-fall was lighter than usual; especially so in the western presidency. On the 12th, however, a small storm began to form over the Bay of Bengal, off Masulipatam, and brought fairly general, though on the whole, light rain, first to a large portion of the peninsula; and then, as the storm moved northward and westward across Orissa and Central India, to the western coast of the Bay, the Central Provinces, Central India, Rajputana and the more southern parts of the North-Western Provinces, and the Punjab. After the disappearance of this storm, on the forenoon of the 21st, over the whole of the Central and Southern India, the rain either ceased altogether or became very light and partial; but in the Eastern Punjab, the North-Western Provinces, Bengal, Assam, and Burma, moderately heavy showers continued to fall till within a day or two of the close of the month.

In the Punjab the rain-fall was everywhere below the average, and the same was the case in Sind; little or no rain having fallen throughout the month in the Indus valley, except locally at Hyderabad, which received only one-third of the normal amount. In the North-Western Provinces to the east of the Ganges, (except in Oudh and locally at Benares,) in North and East Bengal, Assam and Cachar, the rain-fall was greatly in excess of the average; but to the south of the river, in Rajputana, Berar, Khandesh, the whole of the Central Indian plateau, Orissa and South-West Bengal, it was, as a general rule, more or less deficient.

There was more rain than usual in the Carnatic, Mysore and on the Bellary plateau, and in the Deccan the total fall was very near the average. Throughout the rest of the peninsula, as well as in Guzerat and Burma, the rain-fall was below the normal amount.

The following table shows the amount of rain and the difference from the average, during the month of August 1886, according to districts, as far as is indicated by the telegraphic reports:—

SUMMARY OF THE WEATHER

The slight depression of temperature which characterized the month at its close, over the greater portion of the country, and in several provinces, owing to the rains, September was a warm month. In the Punjab, the temperature remained at the average throughout; and, in the latter half of the month, over the whole of the Central Indian plateau. On the mean of the month, the excess amounted to from 2° to 4° in the Punjab, (except in the Derajat and Multan divisions, where it was small;) and from 1° to 4° in Central India, Khandesh, the Deccan and Concan. In the Gangetic plain, Assam, Rajputana, Sind and the Carnatic, the temperature was below the normal average. The depression was greatest in Behar, where it amounted to over $2\frac{1}{2}^{\circ}$.

The atmospheric pressure was slightly below the September average in the Punjab, owing probably to the high temperature. In Rajputana, Guzerat, and locally at a few places elsewhere, there was a slight excess. Elsewhere the differences from the average in both directions were very small. The air was drier than usual throughout North-Western and Central India, as well as in Bombay. In the Carnatic and the North-West of Bengal, however, it was damper than usual.

The rains ceased early in the month in North-Western India, Rajputana, Central India, Sind, Guzerat and a large part of the Deccan; but in Bengal, Burma, Assam and the more eastern districts of the North-West Provinces, they continued to fall almost to its close. In Madras, as well as over a large portion of Bombay, light showers fell at short intervals.

The rainfall was very heavy all over Bengal, and especially in Behar, where it was nearly three times the average amount; and next thereto, in Northern Bengal. In the Carnatic the rainfall was about the average, and in Mysore and on the plateau of Bellary, it was but slightly above it. Everywhere else, the rainfall was more or less deficient, and little or no rain fell in the Indus Valley, Cutch and Guzerat.

The following table shows the amount of rain and the difference from the average, during the month of September 1886, according to districts, as far as is indicated by the telegraphic reports.
